Global Reporting Initiative (GRI) Content Index

We continue to align with the Global Reporting Initiative (GRI) Standards as a basis for disclosure. GRI Standards help businesses, governments and other organizations understand and communicate their impacts on Environment Social and Governance (ESG) issues. They are regularly reviewed to ensure they reflect global best practices for sustainability reporting and help us respond to the needs of our stakeholders and regulators. Accenture has aligned with GRI disclosures and produced a GRI Content Index since our 2008-2009 Corporate Citizenship Report. This report has been prepared referencing the GRI Standards. For more information, please visit the [GRI website](#).

Our ESG priorities can be found in the Reporting & Data section of our [360° Value Report 2022](#). The list represents our highest-priority ESG issues in scope for reporting with the GRI Standards that are included in our GRI Content Index below. For each of those ESG priorities, our [Definitions of ESG Priorities](#) references the specific Standards used as well as Management Approach information.

All reported data is as of and for the fiscal year ending August 31, 2022, unless otherwise noted.

The information and opinions contained in this index speak only as of the date such information was originally prepared by Accenture, and we undertake no obligation to update them, notwithstanding any historical practice of doing so. This index represents our current policy and intent and is not intended to create legal rights or obligations. This index may contain or incorporate by reference public information not separately reviewed, approved, or endorsed by us and no representation, warranty, or undertaking is made by us as to the accuracy, reasonableness, or completeness of such information. Inclusion of information in this index is not an indication that the subject or information is material to our business or operating results or material to investors or that such information is required to be disclosed in our filings with the SEC. Materiality, as used on this index, is distinct from, and should not be confused with, such term as defined for SEC reporting purposes and the information included in, and any issues identified as material for purposes of, this index may not be considered material for SEC reporting purposes.

This site may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as “may,” “will,” “should,” “likely,” “promise,” “commit,” “anticipates,” “expects,” “intends,” “believes,” “estimates,” “positioned,” “continues,” “maintain,” “remain,” “goal,” “target,” “plan,” “recurring” and similar expressions are used to identify these forward-looking statements. These statements involve a number of risks, uncertainties and other factors that could cause actual results to differ materially from those expressed or implied. For a more detailed discussion of these factors, see the information under “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our most recent Form 10-K filed with the SEC. Our forward-looking statements speak only as of the date they are made, and we undertake no obligation to update them, notwithstanding any historical practice of doing so. Forward-looking and other statements on this site may also address our corporate responsibility progress, plans and goals (including environmental and inclusion and diversity matters), and the inclusion of such statements is not an indication that these contents are necessarily material to investors or required to be disclosed in Accenture’s filings with the SEC. In addition, historical, current and forward-looking environmental and social-related statements may be based on standards for measuring progress that are still developing, internal controls and processes that continue to evolve, and assumptions that are subject to change in the future. We caution you that these statements are not guarantees of future performance, nor promises that goals or targets will be met, and are subject to numerous and evolving risks and uncertainties that we may not be able to predict or assess. In some cases, we may determine to adjust our commitments, goals or targets, or establish new ones to reflect changes in our business, operations or plans.
