Governance, leadership, and oversight

7. Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements (listed entity has flexibility regarding the placement of this disclosure).

L&T is a conglomerate with dominant presence in EPC, High Tech manufacturing, IT Services, and Financial Services. These businesses, the EPC and manufacturing in particular, have a significant impact on the environment in terms of GHG emission, energy and water consumption. Given the strong growth aspiration of the Company, the challenge is to balance the growth pursued while minimising its impact on the environment, and also achieve net zero position for both water consumption and carbon footprint by 2035 and 2040 respectively.

In the short term, the Company's aim, even as it grows, is to flatten the emission curve in the next five years, through improved efficiency in the use of energy and increased use of renewable energy across its operations. This apart, the Company also aims to improve its share of green business offerings over the years, which currently stands at around 38%.

Energy transition from fossil fuels to green energy is an established mega trend globally and some of the businesses of the Company like thermal power has already felt the impact of this over the last few years. Another business which could experience an impact over the next 5-10 years is the hydrocarbon business. The Company is therefore evaluating its prospects in green energy areas including green hydrogen, battery storage and offshore wind among others. Overall, the Company intends to reduce its presence across the fossil fuel space and build new businesses around green energy.

The EPC business is very labour intensive, and post-Covid the availability of skilled labour has become a challenge. This constraint could magnify over time as India increases its thrust on infrastructure development, an area that the Company seeks to grow in. Recognizing this, the Company has increased its off-site fabrication and its thrust on pre-cast technology. In addition, the Company is augmenting its mechanization and automation capabilities for on-site work. These initiatives are intended to reduce manual component of work, increase worker productivity, reduce wastages and thereby, improve the cost competitiveness of the business.

In an economy facing shortage of skilled workforce, the Construction Skills Training Institutes (CSTIs) run by the Company's CSR department in India are worthy of mention. Setup in 1995 and currently with a network of 9 CSTIs spread across the country, CSTIs trains over 10,000 youth in construction and allied skills every year. These skill training institutes have grown over the years with a unique industry connect leveraging on the Company's rich experience and deep knowledge of contemporary as well as new-age practices of the construction industry.

The Company's CSR programmes are focused on strengthening the country's social infrastructure with its thrust in areas such as water and sanitation, education, health and skill building. The success of these initiatives lies in delivering impact with optimum use of resources, leveraging strengths and collaborating on areas where capacities need to be built. The Company's Integrated Community Development Programmes (ICDP) being aligned closely to the Sustainable Development Goals (SDGs), is an example of one such effort. The ICDP was initiated 6 years back, specifically in remote water-scarce locations of Maharashtra, Tamil Nadu and Rajasthan. The program was designed with a focus on improving the quality of life of the community by achieving water sufficiency and further expanding into various aspects of sanitation, health, education and livelihood. The ICDP consists of a unique mix of civil interventions (water harvesting structures, farm field structures, sanitation units etc.) as well as targeted programs to build community-based institutions, to provide ownership, accountability, self-management and sustainability of the interventions. These locations have become self-sustaining now, and the Company is replicating this model in other locations.

Across industries, cybersecurity has also become a key concern for the business continuity. Vulnerabilities such as targeted attacks, ransomware threats and phishing have raised the importance of protecting the IT infrastructure and sensitive data of the Company. The Company has developed a robust 5-year cyber security & resiliency roadmap and made investments in state of art security platforms. It has implemented a groupwide Cyber Risk Assurance Framework and operationalised one of the most advanced Security Operations center to monitor developments 24X7 and respond effectively when required to any cyber incidents.

On the governance front, the Management and the Board are involved in active review of the Company's ESG performance on a regular basis. The Company periodically reassesses all key policies such as Sustainability Policy, Supplier Code of Conduct Policy etc. To strengthen the policy framework further, two additional policies namely, Equal Opportunity Policy and 'Public Policy Advocacy' Policy have been recently adopted by the Company.

While BRSR is mandatory from FY23, as a responsible corporate citizen, the Company has decided to report on its business responsibility and sustainability practices from FY22 onwards. This BRSR is a testimony of the Company's commitment to sustainability in all its dimensions and the Company will constantly endeavour to strengthen this further on a continuing basis.

SECTION C: PRINCIPLE WISE PERFORMANCE DISCLOSURE

This section is aimed at helping entities demonstrate their performance in integrating the Principles and Core Elements with key processes and decisions. The information sought is categorized as “Essential” and “Leadership”. While the essential indicators are expected to be disclosed by every entity that is mandated to file this report, the leadership indicators may be voluntarily disclosed by entities which aspire to progress to a higher level in their quest to be socially, environmentally and ethically responsible.

Principle 1: Businesses should conduct and govern themselves with integrity and in a manner that is Ethical, Transparent and accountable.

Essential Indicators

1. Percentage coverage by training and awareness programmes on any of the principles during the financial year:

Segment	Total Number of training and awareness programmes held	Topics/principles covered under the training and its impact	% age of persons in respective category covered by the awareness programmes
Board of Directors	20 manhours	Business, strategy, risk and update of laws	100%
Key Managerial Personnel	20 manhours	Business, strategy, risk and update of laws	100%
Employees other than BOD and KMPs	5,539 no of programmes	Business Principles for Responsible Organisation Code of Conduct and principles of Corporate Governance	97.4%
Workers	929,901 manhours (Trainings and Awareness)	EHS training	100% (EHS Induction Training is mandatory for all the workers who resume work)

2. Details of fines / penalties /punishment/ award/ compounding fees/ settlement amount paid in proceedings (by the entity or by directors / KMPs) with regulators/ law enforcement agencies/ judicial institutions, in the financial year, in the following format:

The Company had no monetary and non-monetary fines / penalties /punishment/ award/ compounding fees/ settlement amount paid in proceedings (by the entity or by directors / KMPs) with regulators/ law enforcement agencies/ judicial institutions, in the financial year FY22 based on materiality thresholds.

Monetary

Punishment	–	–		–	–

3. Of the instances disclosed in Question 2 above, details of the Appeal/ Revision preferred in cases where monetary or non-monetary action has been appealed:

Not applicable

Case Details	Name of the regulatory/ enforcement agencies/ judicial institutions
–	–

4. Does the entity have an anti-corruption or anti-bribery policy? If yes, provide details in brief and if available, provide a web-link to the policy.

Yes, The Company has 'zero tolerance' of any practice that may be classified as corruption, bribery or giving or receipt of bribes and the same has been mentioned in its Code of Conduct. The objective of this policy is to serve as a guide for all directors, executives, employees and associated persons for ensuring compliance with applicable anti-bribery laws, rules and regulations. This policy is applicable to all individuals working at all levels and grades, including Board Members and Senior Managerial Personnel, other employees, consultants, interns, contractors, agency staff, agents or any other person associated with the Company and such person acting on behalf of the Company.

5. Number of Directors/KMPs/employees/workers against whom disciplinary action was taken by any law enforcement agency for the charges of bribery/ corruption:

There have been no cases involving disciplinary action taken by any law enforcement agency on the charges of bribery / corruption against directors / KMPs / employees / workers that have been brought to the Company's attention.

LEADERSHIP INDICATORS

1. Awareness programmes conducted for value chain partners on any of the principles during the financial year:

Total number of awareness programmes held	Topics/principles covered under the training	% age of value chain partners covered (by value of business done with such partners) under the awareness programmes
2,618 participants	Environment, health and safety trainings and awareness, awareness sessions on BRSR and 9 principles therein	Varying from 40% to 65%*

*The top 25 value chain partners (supply chain partners) and also many other suppliers have been covered by the awareness sessions. These supply chain partners comprise 40% to 65% (by value) across the various business verticals. The Company has excluded government entities from the list of its value chain partners (supply chain partners) for these awareness training.

2. Does the entity have processes in place to avoid/ manage conflict of interests involving members of the Board? (Yes/No) If yes, provide details of the same.

The Company has processes on management of conflict of interests involving members of the Board which may arise due to Directors joining the Boards of other companies and even conflicts which would take place during the course of normal business activities. The process allows the Directors to recuse themselves from the discussions pertaining to the conflict of interest. The Directors have to exercise their responsibilities in a bonafide manner in the interest of the Company, should not allow any extraneous considerations that may vitiate their exercise of objective independent judgment in the paramount interest of the Company and not abuse their position to the detriment of the Company for the purpose of gaining direct or indirect personal advantage. Any conflict of interest arising with the Board Members needs to be reported to the Chairman of the Audit Committee/Chairman of the Board.

Principle 2: Businesses should provide goods and services in a manner that is sustainable and safe

ESSENTIAL INDICATORS

1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.

	Current F Y FY21-22 (Cr)	Previous F Y FY20-21 (Cr)	Details of improvements in environmental and social impacts
R&D	–	–	–
Capex	–	–	–

L&T conducts R&D linked to environmental and social initiatives, however currently the expenditures are not tracked.

2. a. Does the entity have procedures in place for sustainable sourcing?
- The Company has a procedure for sustainable sourcing where all the new and existing supply chain partners are mandatorily evaluated on environment, health & safety and sustainability parameters before onboarding. Also, supplier/vendor Code of Conduct (COC) covers EHS and Human Rights parameters to be adhered and value chain partners (supply chain partners) must sign the COC as a part of the contract documents.
- b. If yes, what percentage of inputs were sourced sustainably?
- It is mandatory to furnish the evaluation questionnaire (EHS and sustainability parameters) before onboarding as value chain partners (supply chain partners) and it has 100% coverage.
3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.
- The Company does not have any specific product to reclaim at the end of life. However, at the project and operation sites, there are systems in place to recycle, reuse and dispose in line with regulatory requirement for the above waste being generated during course of construction and operation.
4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

EPR is not applicable as the major business of the Company is construction and associated services and the Company does not manufacture any consumer products. The Company manufactures few heavy construction machineries, specialised industrial units and defence products. There is no specific plastic, electrical and electronic product manufactured where EPR is applicable under E-Waste Management.

Leadership Indicators

1. Has the entity conducted Life Cycle Perspective / Assessments (LCA) for any of its products (for manufacturing industry) or for its services (for service industry)? If yes, provide details in the following format?

Yes, the Company has conducted one LCA study for one of its products (Diamond Green Diesel Reactor) from the Heavy Engineering business vertical in FY22 period.

NIC Code	Name of Product/ Service	% of total Turnover contributed	Boundary for which the Life Cycle Perspective/ Assessment was conducted	Whether conducted by independent external agency (Yes/No)	Results communicated in public domain (Yes/ No) If yes, provide the web-link.
281	Diamond Green Diesel Reactor	Not available	Cradle to Gate	Yes	No

2. If there are any significant social or environmental concerns and/or risks arising from production or disposal of your products / services, as identified in the Life Cycle Perspective / Assessments (LCA) or through any other means, briefly describe the same along-with action taken to mitigate the same.

Name of Product / Service	Description of the risk/concern	Action Taken
Diamond Green Diesel Reactor	The LCA study concludes that maximum environmental impact is associated with procurement of primary raw material (steel) and the energy consumption (grid source) associated with the manufacturing process. Other than these, there is almost negligible impacts in the manufacturing process.	It has been recommended to look for green steel or recycled steel for the manufacturing of this product without compromising the quality of raw material. Also, it has been advised to consider usage of renewable source of energy in the manufacturing process. Management is evaluating this recommendation on feasibility of adoption.

3. Percentage of recycled or reused input material to total material (by value) used in production (for manufacturing industry) or providing services (for service industry).

Indicate input material	Recycled or re-used input material to total material	
	FY 21-22	FY 20-21
Fly ash and Ground Granulated Blast-furnace Slag in place of Cement	11.9%	14.2%
Crushed sand in place of Natural Sand	29.4%	33.4%

4. Of the products and packaging reclaimed at end of life of products, amount (in metric tonnes) reused, recycled, and safely disposed, as per the following format:

Not applicable as the Company does not have any specific consumer product except heavy construction machinery, valves and defence products and there is no product reclamation at the end of the product life. However, the waste material generated at the operation and project sites are reused, recycled and disposed as per the applicable regulatory requirements.

	FY21-22 (Current Financial Year)			FY20-21 (Previous Financial Year)		
	Re-used	Re-cycled	Safely Disposed	Re-used	Recycled	Safely disposed
Plastics (including packaging)	–	5 Tons	0.1 Tons	–	0 Tons	–
E-waste	–	112 Tons	–	–	30 Tons	–
Hazardous Waste	–	732.9 Tons	1541.4 Tons	–	1002.1 Tons	1785 Tons
Other Waste	–	–	–	–	–	–

5. Reclaimed products and their packaging materials (as percentage of products sold) for each product category.

Indicate product category	Reclaimed products and their packaging materials as % of total products sold in respective category

10. Health and safety management system:

- a. Whether an occupational health and safety management system has been implemented by the entity? (Yes/No). If yes, the coverage of such system?

Yes, occupational health and safety management system has been implemented by the entity. It covers the entire operations covering all construction project sites, manufacturing units, industrial production facilities and offices. In line with L&T's vision, philosophy, and EHS Policy, management systems have been implemented in accordance with the International Standards ISO 45001:2018 (Occupational Health and Safety Management System Standard). EHS Management System defines the mandatory requirements for the systematic management and execution within the organisation. The Company's Integrated EHS Management System is accredited by international certification bodies.

- b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?

The Company has in place systematic risk management process to identify and control all the hazards in construction project sites, manufacturing units, industrial production facilities and offices. The Company's risk management process is applied through five steps (Identification, Assessment, Mitigation, Monitoring and Reporting) and is the key driver for controlling the risk of EHS in business. All relevant stakeholders including construction engineers, design and planning engineers, production in charges and EHS team members are involved in risk assessments and the risk management process, Risk Assessments & Safe Work Method Statement are developed and approved prior to starting any work activity. All identified risks and risk mitigation plans are required to be documented, approved and communicated to all relevant parties involved in the activity.

- c. Whether you have processes for workers to report work related hazards and to remove themselves from such risks.

Yes, the Company has processes for workers to report work related hazards and to remove themselves from such risks.

d. Do the employees/workers of the entity have access to non-occupational medical and healthcare services?

Yes, medical centres and first aid facilities are available for both employees and workers.

11. Details of safety related incidents, in the following format:

Safety Incident/Number	Category	FY21-22 Current Financial Year	FY20-21 Previous Financial Year
Lost Time Injury Frequency Rate (LTIFR) (per one million-person hours worked)	Employees	0.1	0.1
	Workers		
Total recordable work-related injuries	Employees	10	8
	Workers	122	75
No. of fatalities	Employees	0	2
	Workers	25	23
High consequence work-related injury or ill-health (excluding fatalities)	Employees	0	1
	Workers	3	0

12. Describe the measures taken by the entity to ensure a safe and healthy workplace.

As a part of the EHS Management system, a project specific EHS plan is prepared at the inception of every new project that determines the broad parameters of EHS management. This EHS plan identifies the hazardous operations and the risks arising from such hazards which are within the scope of the work. It even specifies the required integrated preventive measures (Controls) to mitigate the same.

The Management provides strong demonstrable visible leadership and commitment towards EHS through personal examples and actions. This is the first principle of L&T L.I.F.E (Live Injury Free Each Day) leadership commitment. Management has participated in EHS meetings, conducted site Inspections and EHS Audits, to encourage and develop a positive attitude towards EHS within L&T projects and operations. Management ensured that sufficient EHS resources were available and allocated responsibilities for implementing the L&T LIFE framework. Roles & responsibilities, targets & objectives, goals, training needs & required behaviours had been clearly defined, agreed & communicated throughout the entire organisation & structure.

To support this further, there is a systematic risk management process in place to identify and control all the hazards in projects/units which requires verification of conformity. The EHS management system has various procedures and EHS norms. Therefore, a process has been established for carrying out Internal EHS audits. This process mandates to organise internal audits for all active projects and it is verified by each IC head office audit team at least once in six months. Certain projects were selected for frequent auditing, depending on their status, importance, and risk profile. This was in addition to any external audits carried out by accredited auditors.

	% of your plants and offices that were assessed (by entity or statutory authorities or third parties)
Health and safety practices	100%
Working Conditions	L&T has robust Internal audit process in line with ISO 45001:2018 requirement and it covers all construction projects, offices and manufacturing units. At least one internal audit is conducted in a financial year for all such operations/sites/ manufacturing units/offices.

15. Provide details of any corrective action taken or underway to address safety-related incidents (if any) and on significant risks / concerns arising from assessments of health & safety practices and working conditions.

The Company's EHS Council undertakes a review of all accidents and incidents, and formulate procedures based on risk analysis of data gathered through respective IC. It makes use of advanced technology such as vision analytics/AI to detect any health & safety hazards and gather data. This data is used for predictive analysis, measurement of incidents and unsafe behaviours. This enables identification of the key areas of risk which in turn guides the projects to proactively manage and focus resources to prevent any accidents or incidents. Such analysis is shared throughout the group IC structure, to support L&T Mission ZERO HARM objective.

In view of this collective approach, efforts have been made in understanding the Company's high- risk profile holistically as well as in general. EHS risk management culture has been inculcated across the Company. Various steps have been taken including:

- Implementation of HSE Surveillance Rating
- Developed HSE Training Modules on high-risk activities.
- Developed standardized template of HSE Lessons Learnt (EHS Alert) and these alerts are shared in the centralized knowledge sharing platform which can be accessed by all employees.
- Enrolled Subject Matter Experts (SMEs) into the HSES Management Community of central knowledge sharing module.
- Implementation of senior management audits based on standard checklist developed by the EHS Council.

The outcome of the efforts has been to capture the high-risk hazardous activities ubiquitous in various L&T's Business verticals. This helps to devise an action plan to enhance the competency among stakeholders in managing such activities with higher degree of awareness and suitable training using technology such as AR/VR from competent external agencies as well as subject matter experts. Each employee of the organisation strives to achieve EHS excellence in their respective functions and align their actions and business decisions.

LEADERSHIP INDICATORS

6. Provide details of any corrective actions taken or underway to address significant risks / concerns arising from assessments of health and safety practices and working conditions of value chain partners.

As per the internal EHS audit procedure and assessment carried out, all the observations and non-conformances are properly recorded and notified for closeout. Once closeouts are done, they are recorded with details of closeouts. These details can be retrieved from respective sites, manufacturing units and operations.

The Company, based on all EHS analysis data gathered, has developed several procedures aligned to Sub-contractor procurement and management. The Health, Safety & Environment Management system has been reviewed and aligned to be a part of and fully incorporated into the contract between sub-contractor and the Company. Its purpose is to set forth the areas of EHS concerns and requirements routinely. This subcontractor system is intended to supplement any contractual requirements, including EHS Management System manual, guidelines, Standard Operating Procedures, any requirements of client, as well as sub-contractor's own EHS Programme.

All the suppliers and contractors of the Company are evaluated on their safety infrastructure processes and strengths before awarding a contract. The continued monitoring and measuring of suppliers and contractors ensure a comprehensive safe environment. This is further enhanced with regular refresher training sessions and capacity-building programmes. In addition, periodic site visits by the senior management and site audits improve the EHS performance.

Principle 4: Businesses should respect the interests of and be responsive to all its stakeholders

Essential Indicators

1. Describe the processes for identifying key stakeholder groups of the entity.

L&T's business is primarily EPC – engineering, procurement, construction, and high-tech manufacturing. Hence, in line with its business models, the Company has identified the following as key stakeholder groups:

Stakeholder Group	Basis of Identification
Suppliers/Contractors	<p>EPC and high-tech manufacturing have significant dependence on supply chain partners for</p> <ol style="list-style-type: none"> i) Sourcing of key raw materials e.g., cement, aggregates, steel and other materials for construction projects, and high-grade metals, subcomponents and other inputs for manufacturing business. ii) Outsourcing of business activities e.g., low-end civil works in construction projects and low-end manufacturing <p>To maintain sustainable growth, these partners are key elements in meeting the delivery and cost objectives for various contracts.</p>
Government	Government (central and state) orders make up ~40% of the Company's current orderbook. Additionally, orders from Government owned enterprises contribute to ~44% of the orderbook and therefore, they are the largest clients for the businesses. In addition to providing the business, they also determine policies for various areas as well as determine the future plans for various sectors.
Customers	Private sector makes up ~16% of the orderbook and plays an important role in business plans of the company. Many of them are long-term clients which offer repeat business over period of years and also act as partners in developing new solutions or business offerings.
Employees and Workforce	Construction is a labour-intensive activity, and L&T employs over 200,062 workers in addition to >50,000 of its own employees (including manufacturing). Hence, their skills development, health and well-being are important for the Company's ongoing and future operations.
Regulatory bodies	Various business units of the Company operate in variety of sectors, each of which are governed by specific regulatory bodies. In addition to this, there are bodies which oversee different steps in EPC and manufacturing air pollution control. It becomes important to understand priorities of these agencies and address their concerns, if any, to maintain compliance levels and establish benchmark performance levels.
Shareholders and Investors	Shareholders and investors make an important contribution to the growth of the company by providing financial resources for short term i.e., working capital and long term i.e., capital expenditure and investments. They also play an important role through exercise of their voting rights with respect to important plans of the Company.
Media	Media acts as important channel of communication of Company's performance, policies and plans. They also help in reverse loop in highlighting concerns or issues related to the Company. In order to ensure that there are no gaps in communication, engagement with media entities is a continuous process.
Communities	L&T helps catalyse socio-economic development of communities around its premises and at various locations across the country. Focus is on under-privileged and marginalized sections to enable them to bring them on-par with others.

2. List stakeholder groups identified as key for your entity and the frequency of engagement with each stakeholder group.

NA: Data not available

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

Yes, the assurance has been conducted by DNV India.

9. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

L&T is certified under ISO 14001:2015 and the scope covers its entire operations including offices, headquarters, construction projects and temporary facilities, manufacturing units and industrial facilities. Under the environmental management system, the Company has guidelines for comprehensive waste management (which is under revision now) for the identification, segregation, collection, recycling and final disposal. Wherever applicable the company follows 6R principles (Rethink, Reduce, Reuse, Recycle, Refuse and Repair) for waste management. Awareness sessions are undertaken for the employees who have a role and responsibility towards waste management. Performance is monitored and waste data is collected quarterly through the sustainability data management platform (SoFi).

10. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details in the following format:

S. No.	Location of operations/offices	Type of Operations	Whether the conditions of environmental approval / clearance are being complied with? (Y/N) If no, the reasons thereof and corrective action taken, if any.
1	Mumbai Coastal Road Project (package 1 and 4)	Construction projects	Yes

*In FY20-21 the data was not captured by the Company

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

Yes, the assessment has been conducted by DNV, India.

5. With respect to the ecologically sensitive areas reported at Question 10 of Essential Indicators above, provide details of significant direct & indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities.

All the projects and industrial facilities listed in Question 10 of the Essential Indicators above, are either operating near coastal areas coming under CRZ Notification 2011 or forest and other sensitive zones as identified within the respective EIA studies conducted earlier (not in FY22) where Environmental Clearance (EC)/approval and permits as applicable are in place. The significant direct impact as identified in EIA study was on marine biodiversity for the Company's marine projects and pollution load to the nearby settlements, water bodies and forest. All the requisite environmental management plans including marine biodiversity conservation plan are in place and implemented. All the regulatory compliance reports are being submitted as mentioned in the EC/Approval terms and conditions. Further, all the applicable Consent to Establish (CTE) and Consent to Operate (CTO) are in place for Batching Plants, Precast Yards, Fabrication Yard, and Industrial Facilities as applicable.

6. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, please provide details of the same as well as outcome of such initiatives, as per the following format:

Sr. No	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
1.	Plastic Waste Management	The waste collection & segregation is conducted daily to minimize the waste generated at the site, minimize environmental impact, keep workplace, aisles hazard free. With the help of a third-party manufacturer & supplier-PGS enterprises India LTD., Pune, WET IC sends its plastic waste to be recycled into plastic granules, polyfuel, etc.	(i) Waste Impact: 331.6 kg/Yr Plastic Waste recycled into Polyfuel / Granules (ii) 108 Staff and 194 Workmen participated in the initiative, and they were also trained by the IC. (iii) Emission Impact: 665 kgCO ₂ e per annum emissions avoided (Per kg of plastic, about 6 kg of carbon dioxide is emitted during production and incineration) ² (iv) Water Impact: Water footprint is about 5.3 litres of water to produce typical single-use water ³ .
2.	LEED Platinum Certification for AM Naik Tower	(i) Used percolation pits along the periphery Storm Water Drain for Groundwater recharge (ii) Usage of organic waste for treating kitchen & organic waste (iii) Using AC condensate water for domestic reuse (iv) Highly efficient HVAC equipment lifts with Regen drive for energy savings	(i) Emission Impact: 700 tCO ₂ e/year (ii) Water Impact: (a) Rainwater Tanks: 60 KL/year (b) Sewage Treatment Plant (STP): 96,000 KL/yr (iii) Waste Impact: 135 tonnes/Year
3.	Alternate material for Backfilling and Temporary works in Underground Metro Station	Use of Crusher Dust (CRF-Crushed Rock Fines) and TBM (Tunnel Boring Machine) Excavated Muck instead of M-Sand in CLSM (Controlled Low strength Material) for Backfilling and Temporary Works	(i) Savings through reduction in raw material usage: ₹ 1.31 Cr. (ii) Emission Impact: 111 tCO ₂ e (iii) Water Impact: 2525.6 KL (iv) Waste impact: 1.15 tonnes (v) Saving through reduction of water usage: ₹ 0.08 Cr (vi) Energy saving cost: ₹ 0.15 Cr.
4.	Extension of electrically powered gantry cranes	L&T Modular fabrication is into fabrication of modular structures for onshore and offshore installation. Fabrication of such structures involve extensive handling of individual steel members with weight ranging from 200 Kilograms to a higher range of 8,000 kilogram.	(i) Emission Impact: 4874 MT/year (ii) Energy saving cost: 1.5 million USD (iii) 30 % higher travel speed (No load)

The complaints or grievances received from community is addressed by the site management involving the industrial and administration department and also the clients, as applicable. Any issue which is unresolved or needs management intervention is escalated to the respective business heads. Any community member can raise complaint on Company's toll-free number and email address provided at Company's website which is monitored, addressed and proper record is maintained under Whistle Blower Policy.

For CSR Projects

In the Community based CSR projects, L&T representative from CSR team facilitates the interaction between the beneficiary groups, addresses concerns and resolves issues if any.

Process followed is as under:

- During monthly or quarterly review meetings community conflicts that impact the implementation or outcomes of the project are discussed.
- During the quarterly review visit by L&T representative, concerns and issues are discussed with the community-based groups e.g. Farmer's Association, Self Help Groups or Village Development Committees.
- L&T along with other stakeholders analyse the conflicts, discuss the alternatives, pros and cons and identify the probable strategies/solutions. Community-groups are encouraged to resolve the issues by negotiating with the concerned persons or groups in the community.

- (iv) Community Groups are empowered by disseminating relevant knowledge, information, conducting skills training and encouraging them to assume leadership in conflict management.
- (v) If the community themselves are unable to resolve a certain conflict, L&T representatives intervene and facilitate negotiations between different groups in the community and stakeholders.

4. Percentage of input material (inputs to total inputs by value) sourced from suppliers:
