2023

Global Reporting Initiative (GRI) Content Index

We continue to align with the Global Reporting Initiative (GRI) Standards as a basis for disclosure. GRI Standards help businesses, governments and other organizations understand and communicate their impacts on Environment Social and Governance (ESG) issues. They are regularly reviewed to ensure they reflect global best practices for sustainability reporting and help us respond to the needs of our stakeholders and regulators. Accenture has aligned with GRI disclosures and produced a GRI Content Index since our 2008-2009 Corporate Citizenship Report. This report has been prepared referencing the GRI Standards. For more information, please visit the [GRI website](#).

Our ESG priorities can be found in the Reporting & Data section of our [360° Value Report](#) 2023. The list represents our highest-priority ESG issues in scope for reporting with the GRI Standards that are included in our GRI Content Index below. For each of those ESG priorities, our definitions of ESG Priorities references the specific Standards used as well as Management Approach information.

Accenture has reported the information cited in this GRI content index for the period fiscal 2023 (1 September 2022 through 31 August 2023), unless otherwise noted, with reference to the GRI Standards.
