This report contains the RELX PLC Non-Financial
Information Statement for the purposes of
Section 414CB of the Companies Act 2006.

Our approach to corporate responsibility

Our focus on corporate responsibility and ESG performance underpins the long-term financial health of our business and helps us meet the expectations of all our stakeholders.

Dr Márcia Balisciano

Global Head of ESG and Corporate Responsibility, RELX

CR and risk

In this report we outline our principal risks, which map to our CR priorities, including meeting customer needs, attracting and retaining the right people, maintaining an ethical supply chain and managing climate risks as presented in our Taskforce for Climate-related Financial Disclosure (see CR Disclosure Standards 1). We also indicate our alignment with the Sustainability and Accounting Standards Board (see CR Disclosure Standards 2).

We review the implications of our identified risks to ensure appropriate mitigation. For example, one strategic risk is customer acceptance of our products and services; we must therefore make certain they are reliable and high quality, responding to the views expressed through customer feedback programmes, including Net Promoter Score, and access initiatives to ensure those who might benefit from our products and services can do so. In this way, we minimise risk of financial loss and damage to our corporate reputation.

Corporate responsibility (CR) and environmental, social and governance (ESG) performance begins with the purpose of the company.

RELX is a global provider of information-based analytics and decision tools for professional and business customers, enabling them to make better decisions, get better results and be more productive.

Our purpose is to benefit society by developing products that help researchers advance scientific knowledge; doctors and nurses improve the lives of patients; lawyers promote the rule of law and achieve justice and fair results for their clients; businesses and governments prevent fraud; consumers access financial services and get fair prices; and customers learn about markets and complete transactions.

Our purpose guides our actions beyond the products that we develop. It defines us as a company. Every day across RELX our employees are inspired to undertake initiatives that make unique contributions to society and the communities in which we operate.

To be a leading company requires acting with CR; that is, with the highest ethical standards, while channelling our strengths to make a positive difference for society. To us, CR is not a programme or

prescriptive set of activities, it is how we do what we do on a daily basis. It is the responsibility of everyone at RELX.

CR gives us long-term sustainable competitive advantage. It inspires confidence in our stakeholders, and provides a 'license to operate' in the communities in which we live and work. It underpins our business strategy to deliver improved outcomes for our customers by combining content and data with analytics and technology across global platforms and helps us build leading positions in our markets by leveraging our skills and assets.

We align the objectives we set for our unique contributions, as well as those for the significant areas that affect all companies – governance, people, customers, community, supply chain and environment – with the United Nations Sustainable Development Goals (SDGs) to support the achievement of these 17 global goals by 2030.

We believe in timely, comprehensive reporting (see CR Disclosure Standards 2 and 3 for how we align with key standards, including the Sustainability Accounting Standards Board and the Global Reporting Initiative). Key non-financial metrics for environment, people and supply chain are assured by EY. Corporate Citizenship assure our community disclosures against the Business for Societal Impact (B4SI) Framework. Full assurance statements are available at www.relx.com/additional-cr-resources. CR is an integral part of the statements of the Chair, CEO and CFO (see pages 3, 4, and 82-87).

We pursue robust governance of CR and ESG issues for which the CEO is directly responsible to the Board. The leaders of our four businesses are held to account by the CEO, reinforced by objective setting and monitoring by our CR Forum and the involvement of over 3,500 colleagues in our internal CR networks (page 33).

Sustainable Development Goals (SDGs)

We're committed to doing our part to advance these essential objectives for the world. Throughout the Corporate Responsibility section of this report, SDG icons highlight the SDGs relevant to the content.

The Corporate Responsibility Report is an integral part of our Annual Report and Financial Statements. This section highlights performance against our 2022 corporate responsibility objectives.

Non-financial information statement

RELX is required to comply with the reporting requirements of Sections 414CA and 414CB of the Companies Act 2006, which relate to non-financial information. The list below outlines where this information can be found:

Reporting requirement:

Environmental matters	63-72, 73-78
Employees	44-49
Social matters	32-39
	32-39, 44-49, 59-62
Human rights	59-62
Anti-corruption and anti-bribery matters	40-43, 59-62
Policies, due diligence processes and outcomes	40-43, 59-62
Description and management of principal and emerging risks and impact of business activity	88-95
Description of business model	5-9
Non-financial metrics	31

Directors' duties and Section 172 Statement

The Directors of RELX PLC – and those of all UK companies – must act in accordance with their duties under the Companies Act 2006 (the Act). These include a fundamental duty to promote the success of the Company for the benefit of its members as a whole. The Board of RELX PLC, and its individual members, consider that they have done so for the year ending 31 December 2022.

Details of how the Board and its Directors have fulfilled these duties can be found throughout this 2022 Report, and therefore the following sections have been incorporated by reference into this Section 172 Statement and, where necessary, the RELX 2022 Strategic Report:

Business model and strategy	5-9
Corporate responsibility report	28-80
Principal risks	88-95
Culture and workforce policies	104-106
Board decision-making	106-108
Stakeholder engagement	109-112

Section 172 of the Act requires the Directors to have regard to, among other matters, the interests of the Company's stakeholders in working to promote the success of the company. The Board recognises the importance of building and maintaining sound relationships with RELX's key stakeholders in order to achieve its business aims. Among the Group's many and varied stakeholders, the Board has identified investors, employees, customers, suppliers and the communities in which we operate, as the Company's key stakeholders. Given its size, diversity and global business, stakeholder engagement takes place at all levels across the Group. To ensure adequate visibility of key stakeholder views, the Board received a detailed overview in the year covering engagement channels and activities the Company has with each of its key stakeholders.

In 2022, the Board also continued to oversee our substantial corporate responsibility activities, and maintained its focus on RELX's environmental, social and governance (ESG) performance. The Board's oversight on ESG matters is detailed on page 107 as part of Board activities, and page 111 as part of the Board's engagement with the communities in which we operate.

2022 key corporate responsibility data

	2018	2019	2020	2021	2022

1 We define senior leaders as colleagues with a management grade of 17 and above. People figures for 2020 and 2021 have been restated accordingly. Previously we defined senior leaders as either a) colleagues with a management grade of 17 and above, based on our job architecture framework developed with external input and b) colleagues with a management grade of 16 (and above) with a hierarchy of 4 (or 5 in some circumstances) reporting levels from the CEO.

2 Data reporting methodology assured by Business for Societal Impact (B4SI). Reporting period covers 12 months from December 2021 to November 2022.

3 See B4SI assurance statement at www.relx.com/additional-cr-resources.

4 All Group employees can take up to two days off per year, coordinated with line managers, to work on community projects that matter to them. Number of staff volunteering reflects the number of staff using their two days, as well as those who participated in other Company-sponsored volunteer activities.

5 Accident reporting covers approximately 82% of global employees.

6 We continue to refine our supplier classification and hierarchy data, contributing to changes in the number of suppliers we track year-on-year.

7 Signatories to the RELX Supplier Code of Conduct include suppliers who have not signed the Supplier Code, but have equivalent codes. These suppliers are subject to the same audit requirements as Supplier Code signatories.

8 We compensated for emissions in Scope 1, Scope 2 and Scope 3 (work-related flights, hotels, cloud computing, home-based working and commuting) by purchasing offsets. Climate change and environmental data (carbon, energy, water, waste) covers the 12 months from December 2021 to November 2022. Previous years have been restated to include the one RX managed event venue.

9 We purchase renewable electricity on green tariffs at locations in the UK and the Netherlands. US Green-e certified Renewable Energy Certificates (RECs) are applied to electricity consumption in the US. US Green-e certified RECs are also purchased to equal 100% of the electricity consumption outside the US; we do not apply any market-based emissions factors on this portion of electricity consumption.

10 Waste sent to/ diverted from landfill from reporting locations excluding estimates.

11 Covers all flights booked through our corporate travel partner. BEIS methodology uses the UK Government RF Conversion factors. Further details on the Cirium methodology are available on page 9.

12 Percentage of paper in Book Chain Project graded 3 or 5 (known and responsible sources) or certified to FSC or PEFC.

¹ Data assured by EY.

Prioritising key issues

To understand which issues we should focus on, we consider our business priorities and engage regularly with stakeholders. Examples of our stakeholder engagement can be found at www.relx.com/additional-cr-resources.

Every two years, we formally ask stakeholders to assess our impact areas. In 2021 CR consultancy, Carnstone, contacted over 270 stakeholders – including investors, employees and suppliers – to rank 14 issues we consider important to the business. All 14 CR priorities were rated as either significant or very significant by 26% or more of respondents (as a minimum), indicating that we are focusing on issues they believe are critical for us. Their ranking of our top priority issues are reflected in the table below.

Ranking no.	Impact on society and the environment	Impact on RELX
	Priority issues:	Priority issues:
1	RELX unique contributions to society	Having the right people
2	Access to information	Data privacy and security
3	Managing environmental impacts	Responding to customer needs
4	Health, safety and well-being	RELX unique contributions to society
5	Responding to customer needs	Governance and ethical practice
6	Having the right people	Health, safety and well-being
7	Promoting diversity	Editorial standards
8	Governance and ethical practice	Promoting diversity
9	Transparent, comprehensive reporting	Access to information
10	Data privacy and security	Transparent, comprehensive reporting
11	Editorial standards	Managing environmental impacts
12	Sustainable supply chain	Tax, pensions and investments
13	Supporting our communities	Sustainable supply chain
14	Tax, pensions and investments	Supporting our communities

Commitment to the United Nations Global Compact

The United Nations Global Compact (UNGC) links businesses around the world with UN agencies, labour and civil society in support of Ten Principles encompassing human rights, labour, the environment and anti-corruption. Each year, we work to further UNGC principles within RELX and in our supply chain. In the year we demonstrated leadership as one of 850 early adopters of the new Enhanced Communication on Progress, among more than 18,000 signatories. We contributed to the UNGC Expert Network and key SDG working groups on Modern Slavery, Diversity, Equality and Inclusion and Transformational Governance and shared our expertise as panelists at UNGC events, including the 2022 UK Climate Action Summit. Our Global Head of ESG and CR serves as the Chair of the UNGC UK Network and on the Board of the Foundation for the Global Compact, which provides financial, operational and programmatic support to the UNGC.

The UNGC is a partner of the RELX SDG Resource Centre, which features UNGC content. The UNGC UK Network was a partner on the virtual RELX SDG Inspiration Day, which brought together over 400 representatives from business, the investor community, academia, non-profit organisations and civil society to inspire action and collaboration to advance the global goals.

For how we put the Ten Principles into practice over the past year, see our Communication on Progress at www.unglobalcompact.org/what-is-gc/participants/7909.

WE SUPPORT

2022 awards for excellence

Our employees, products and shows are regularly recognised for excellence. In 2022, for example:

Risk

LexisNexis Risk Solutions was named Best Cybersecurity Provider by Waters Rankings for LexisNexis ThreatMetrix

LexisNexis Risk Solutions was awarded Best Solution Anti-fraud at the Regulation Asia Awards for Excellence 2022

Scientific, Technical & Medical

Elsevier's Reaxys won Data Engineering Excellence at Analytics India Magazine's Data Science Excellence Awards

Elsevier won the Customer Centric Culture category at the European Customer Centricity Awards

Legal

LexisNexis Legal & Professional's Center for Automation and Process Excellence (CAPE) won Best Digital Transformation Project at the Global OPEX Awards

The CEO of LexisNexis Legal & Professional South Africa, Videsha Proothveerajh, received the Woman in Tech award at the 2022 Africa Tech Week Awards

Exhibitions

RX won three awards for Best Global Culture, Best Marketing Team and Best Leadership Team at the Comparably Awards

RX won the Trade Show News Network Comeback Award for JCK, the world's largest jewelry trade show

Our unique contributions

Our unique contributions are how we make a positive impact on society in the conduct of our business.

Universal, sustainable access to information

Advance of science and health

Protection of society

Promotion of the rule of law & access to justice

Fostering communities

Santiago Espinoza
Director, Market Planning
LexisNexis Risk Solutions

Lack of access to sustainable credit is one of the biggest challenges in fighting poverty and increasing economic opportunity in emerging markets. Our products are helping to address this challenge.

2022 PERFORMANCE

Meaningful support of SDG 10 by expanding financial inclusion pilots in low-income countries; use of products and services to reduce online fraud and identity theft

Financial inclusion is essential to the SDGs. With adequate wages and access to appropriate financial tools, citizens are lifted out of poverty, (SDG 1); avoid hunger (SDG 2); have better health (SDG 3); are more likely to receive quality education (SDG 4); and more women are likely to aid the financial well-being of their communities (SDG 5), among other SDG benefits.

However, according to Global Findex estimates, published by the World Bank in 2021, 1.7bn adults in the world lack an account with a financial institution or a mobile money provider. A joint study by McKinsey and the IFC estimates that micro and small enterprises face a \$2tn credit gap,

which slows economic growth. The challenge of financial inclusion is often magnified in low-income countries, given gaps in identity verification and credit risk assessment.

Risk uses alternative credit data, such as professional licenses, asset ownership, higher education data and other public records to help lenders better assess borrowers ensuring consumers are not underestimated while addressing the problem of 'credit invisible' people, those with no credit record.

In 2022, Risk launched Decision Trust, leveraging global intelligence on consumer behaviour to help lenders determine the fraud risks associated with a credit application; enabling greater financial inclusion for those lacking sufficient credit history with local credit bureau databases. Alternative data modelling has allowed customers to increase their acceptance rates by up to 500% because they now have visibility into previously excluded population groups. Decision Trust is opening up opportunities for customers to engage with otherwise credit-invisible candidates who represent roughly 75% of the adult population in emerging markets around the world. Decision Trust has a pipeline of 58 initiatives across various markets, including Chile, Colombia, Indonesia, Mexico, Peru, South Africa and Vietnam.

Risk

LexisNexis Risk Solutions' (LNRS) products and services align with SDG 16 (Peace, Justice and Strong Institutions) and SDG 10 (Reduced Inequalities), among others. Our products and services help citizens access vital government benefits, protect society by detecting and preventing fraud across a range of business sectors and at US government levels, and help law enforcement keep communities safe. We have established data privacy principles, governance structures and control programmes designed to ensure data privacy requirements are met and personally

identifiable information is protected, and individuals' privacy concerns are addressed across all jurisdictions where we operate. We work with established privacy advocacy groups, federal and state legislators and other interested parties and always operate within relevant legal, regulatory, ethical and best practice frameworks.

In 2022 Risk combined Artificial Intelligence (AI) with a host of complex fraud signals to better predict when an online banking user is about to send a payment to a fraudster. Following trials with two major UK banks, there was a 120% increase in

detection of in-progress authorised push payment fraud among online banking customers. In 2022, LexisNexis Financial Crime Digital Intelligence, a financial crime compliance solution that leverages digital identity data to transform compliance workflows, was recognised with Aite-Novarica Group's 2022 Anti-Money Laundering Impact Award which recognises organisations and vendors for new and disruptive financial crime solutions that most effectively and efficiently counter escalating financial crime threats.

The ADAM programme was developed and donated by LNRS in 2000 to help the National Center for Missing and Exploited Children (NCMEC) find missing children. ADAM technology, which is maintained and enhanced by LNRS employees, distributes missing child alert posters to law enforcement, hospitals, retail, businesses and the public within specific geographic search areas. In 2022, ADAM distributed 1.5m poster alerts in over 1,880 missing child cases that helped NCMEC resolve over 1,300 missing child cases.

Scientific, Technical & Medical

Elsevier plays an important role in advancing human welfare and economic progress through its science and health information, which spurs innovation and enables critical decision-making. Among others, Elsevier makes a significant contribution to SDG 3 (Good Health and Well-Being), SDG 5 (Gender Equality), SDG 10 (Reduced Inequalities) and SDG13 (Climate Action).

To broaden access to its content, Elsevier supports programmes in places where resources are often scarce. Among them is Research4Life, a partnership with UN agencies and over 200 publishers; we provide core and cutting-edge scientific information to researchers in 125 low-and middle-income countries. As a founding partner and leading contributor, Elsevier provides around 15% of the material available in Research4Life, encompassing approximately 5,000 journals and 30,000 e-books.

In 2022, there were over 1.5m Research4Life downloads from ScienceDirect. In serving the global scientific research community, Elsevier published over 600,000 articles in 2022.

In 2022, the Elsevier Foundation advanced Research4Life's new Country Connectors initiative which aims to heighten awareness and use of Research4Life content, building communities of users by establishing national focal points in Bhutan, Eswatini, Ghana, Kenya, Liberia, Sierra Leone and Tanzania. Connectors are creating tailored networking, information skills building and promotion, empowering users to drive change in their communities.

To bridge the clinical practice gap in low-income countries, the Elsevier Foundation continued its partnership with Amref HealthAfrica's LEAP programme which scales mobile learning for healthcare workers in Ethiopia. Elsevier data scientists are working with long-standing partner, Datakind, to build predictive analytics capacity to help Amref understand how its platform engages learners and health outcomes.

SSRN is Elsevier's preprint and early-stage research platform. It enables researchers around the world to openly share their work so that it's freely available to others in their field and the wider research community, promoting discussion, collaboration and the exchange of ideas. In 2022, SSRN exceeded 1m papers on the platform with over 200m content downloads.

2022 PERFORMANCE

Meaningful support of SDG 3 and SDG 10 by championing inclusive health and research through global partnerships

Focus on a range of projects including the Sansum Diabetes Research Institute's Latino community scientists and the Black Women's Health Alliance to improve health care outcomes and reduce health disparities for African American and other minority women and families in Philadelphia.

The Elsevier Foundation works to help underserved communities around the world achieve better health outcomes and a more sustainable research ecosystem.

Latino communities in the United States are disproportionately burdened by obesity and type 2 diabetes, and the many serious associated medical complications. Between 2020 and 2022, the Elsevier Foundation partnered with the Sansum Diabetes Research Institute to evaluate the therapeutic benefits, acceptability and dissemination of a culturally tailored, diet-focused lifestyle therapy programme. The project trained bilingual community health workers (Especialistas) to conduct diabetes outreach within Latino communities. They provided wearable digital health technologies, such as continuous glucose monitoring devices and activity and sleep trackers, and explained processes and

results in lay terms. Using validated questionnaires to capture associated psycho social data from participants, the studies are assessing the clinical effectiveness of lifestyle therapy programmes among Latino adults.

The Black Women's Health Alliance aims to improve healthcare outcomes and reduce health disparities for African American and other minority women and families in Philadelphia through advocacy, education, research and support services. Its Millennial Sister Circle uses holistic approaches to health and well-being to support African American women in Philadelphia, aged 18-39 years. In 2022, they introduced a four-chapter curriculum covering a range of issues including stress management, trauma and depression, and financial health, with an emphasis on health-prioritised lifestyle. A dedicated app, e-modules, and a resource guide supported five virtual sessions in the year.

Legal

LexisNexis Legal & Professional (LNL&P) advances SDG 16 (Peace, Justice and Strong Institutions) through its products and services that promote the Rule of Law. The LNL&P global legal and news database contains 144bn documents and records providing transparency of the law in more than 150 countries, with some 1.2m new legal documents added daily.

Through its content, data and analytics, LNL&P supports the four components of the Rule of Law: transparency of law, equality under the law, independent judiciaries and accessible legal remedy.

Legal has partnered with the International Bar Association (IBA) on the eyeWitness to Atrocities App, which allows human rights defenders to document and report human rights abuses in a secure and verifiable way so information can be used as admissible evidence in relevant forums such as the International Criminal Court of Justice. LNL&P utilises its premium data hosting capabilities to provide a secure repository for the information collected, with over 40,000 photos and videos uploaded to date, including over 20,000 relating to allegations of Human Rights abuses and crimes against humanity in Ukraine. In 2022, we provided support for the creation of a Ukrainian language version of the app.

In 2022, Legal, in partnership with the LexisNexis Rule of Law Foundation (LNROLF) and the Ukrainian National Bar Association, developed the LexisNexis Legal Aid Portal – Ukraine. The portal allows law firms and corporations to offer legal jobs and complimentary legal assistance to Ukrainian lawyers, enabling them to receive help from anywhere in the world.

Legal, in partnership with the LNROLF, also launched the LexisNexis US Voting Laws and Legislation Centre in 2022. This tool, created by a LexisNexis team of over 50 employees, provides free public access to over 40,000 US state and federal voting laws and related legislative changes, providing unbiased, non-partisan information for understanding current laws, and changes over time.

Legal launched a new ESG tracker in 2022 that leverages Nexis Newsdesk to allow users to explore ESG trends and conduct customisable searches. It includes a search bar delivering the top 15 ESG-related news stories sourced in real time, drawing on nearly 100,000 news sources written in over 90 languages. The ESG tracker allows users to create comparisons between their ESG efforts and those of competitors.

In 2022, the LNROLF completed a multi-year project in support of the Defence Bar of Indonesia. Along with experts from the International Legal Foundation and the Attorney General Alliance, LNROLF facilitated training for defence lawyers and prosecutors on why input from both are essential to a fair trial. In addition, legal colleagues reviewed and supported the relaunch of a Human Rights Assessment Tool for Oxfam which allows citizens to protect their rights by providing details on their human rights status to government authorities.

Since 2008, LNL&P has partnered with industry associations to recognise individuals and organisations for their commitment to the Rule of Law. 2022 award honourees include Ghana's Yorm Ama Abledu, recipient of the Outstanding Young Lawyer Award, jointly established by LNL&P and the IBA Young Lawyers Committee, for her demonstrable passion for mentoring the next generation of African legal professionals. In 2022, LNL&P also partnered with the IBA to establish the IBA Rule of Law Forum/LexisNexis Rule of Law Lifetime Achievement Award, which was presented to Benjamin B. Ferencz, for his dedication to the Rule of Law.

2022 PERFORMANCE

Meaningful support of SDG 16 through advancing a legislative review project with the UK National Crime Agency and the International Centre for Missing and Exploited Children on child sexual abuse reporting and data sharing across nine countries

The LexisNexis Global Legal Team volunteered their time and expertise to develop a research piece on the legislation that companies operate within that may impact child sexual abuse reporting and data sharing. The team included colleagues from Australia, Canada, Germany, Hong Kong, the Philippines, Singapore, South Africa, the UK and the US. Research was conducted on data protection sharing and legal reporting obligations in 84 jurisdictions across the globe in support of a project that the UK National Crime Agency coordinated with the International Centre for Missing and Exploited Children.

This project is a great example of how we leverage our core business assets, our people, their expertise, and their passion, to advance the Rule of Law.

Nigel Roberts

VP Global Associations, LexisNexis Legal & Professional and VP LexisNexis Rule of Law Foundation

Exhibitions

RX events strengthen communities and supports the SDGs, including SDG 11 (Sustainable Cities and Communities) and SDG 10 (Reduced Inequalities). In addition, RX events support SDG 13 (Climate Action) by allowing customers to conduct business more efficiently in a single setting, avoiding the need to travel and expend more emissions in order to see customers individually.

RX saw a strong return to face-to-face events in 2022. According to RX's 2022 Customer Mindset Tracking Study, face-to-face business remains a key priority for customers looking to rebuild supply chains, renew their order books, and grow their businesses in a post/late Covid-19 world. 75% of small and medium enterprises which have been hardest hit by the absence of live marketplaces over the past two years, said trade events offered them something that they cannot get elsewhere. Returning customers also took advantage of new RX digital and data analysis tools to source business solutions and suppliers, capture more leads, and analyse and improve their event performance.

In 2022, as part of its five-year, \$1m commitment to racial equity, RX supported two new charity partners: The Research in Color Foundation, a US-based, non-profit organisation which seeks to diversify economics through mentoring and financial support; and the GO Foundation in Australia, which creates opportunities for indigenous youth through educational scholarships, cultural connection days and mentoring.

At the 2022 MIPTV television market, RX France presented its third annual MIP SDG Award which honours media companies for their contribution to delivering the SDGs. The 2022 award was presented to Association of Commercial Television and VOD Services in Europe, in recognition of its work combatting the spread of online disinformation. Junk Kouture received the first MIP SDG Innovation Award for encouraging young people to create high fashion from recycled materials. The event also features the MIPCOM Diversify TV Excellence Awards, now in their sixth year, to honour the most compelling creators, characters and stories promoting diversity and inclusion on-screen. Among them were Pour toi Flora, a Radio Canada drama that explores the legacy of the trauma inflicted on Canada's indigenous communities and Exceptional, a teen drama about a girl with autism, from Israel's Kan 11.

Building on the success of its US programme for guests with disabilities, ReedPop introduced an accessibility programme at MCM Comic Con London for the first time in 2022 to ensure all fans had an equally rewarding experience. This included special assistance stickers and carer passes, special assistance lanes for entry to the venue, show floor and main stages, and British Sign Language interpreters for selected panels. The team also provided a dedicated 'Reset Room', staffed by volunteers from the mental health charity Gaming the Mind, for anyone feeling anxious, overstimulated or simply needing time out.

2022 PERFORMANCE

Meaningful support of SDG 11 including a focus on show content supporting net zero and the transition to a low-carbon economy

As a founding signatory of the UFI Net Zero Carbon Events initiative, RX attended COP 27 in Sharm El Sheik in November to launch the global event industry's Sustainable Roadmap. In the year, RX also established an internal Global Sustainability Council to drive its own roadmap to net zero and published a sustainability playbook for event teams.

Sustainability topics are embedded into a range of shows. For example, the National Hardware Show, Las Vegas, featured HABITAT, a new curated showcase for sustainable ideas and technologies at home. HABITAT educated buyers on what to look for when sourcing sustainable products and flagged opportunities for retailers in this rapidly growing market.

The Sustainability Corner at In-cosmetics Global provided an interactive educational area where participants could present sustainable ingredients and technologies to potential partners. The 2022 edition in Paris welcomed over 44 exhibitors (up from 29 in 2019), reflecting growing momentum towards a more conscious beauty industry.

Ahead of Batimat, the world's largest event dedicated to building and construction, RX embarked on a Low Carbon Construction Tour of 12 European and African cities to raise awareness of low-carbon solutions for the construction industry.

Working in partnership with the China Nonferrous Metals Processing Industry Association, Aluminium China 2022 delivered its annual 'Aluminium Packaging Public Welfare

Zone' to showcase sustainable advantages of aluminium packaging. The zone featured interactive can recycling, and visitors were invited to redeem environmentally friendly aluminium cans. As they did, they helped illuminate a carbon footprint tree. Some 1,000 cans were collected during the three day event.

Our global portfolio of energy business events offer a platform for thought leadership, and a showcase for clean energy transition.

Helen Sheppard
Sustainability Director, RX

Across RELX

Recognising that across RELX we have products, services, tools and events that advance the UN's 17 SDGs, we created the free RELX SDG Resource Centre in 2017 to advance awareness, knowledge and implementation. Since 2017, we have made over 1,500 journal articles and book chapters free to access via the RELX SDG Resource Centre which would have otherwise cost over £3m to make open access.

We held our annual RELX SDG Inspiration Day in the year with a focus on SDG16, Peace, Justice and Strong Institutions, giving thought leaders, corporate representatives, investors, governments, and NGOs a common platform to discuss challenges and opportunities for collaboration. Keynote

speakers included former Secretary General of the United Nations, Ban Ki-moon, and legendary musician and political activist, Sir Bob Geldof.

2022 marked the twelfth year of the RELX Environmental Challenge, focused on providing improved and sustainable access to water and sanitation where it is presently at risk. The \$50,000 first prize winner was Caminos de Agua, a US charity operating in Mexico which develops low-cost, community-run groundwater treatment systems that remove arsenic and fluoride from community water supplies. The \$25,000 second prize winner was MSABI, a Tanzanian organisation with a subscription-based model for maintaining community water pumps. For more information see page 69.

2022 PERFORMANCE

Advance the SDGs by increasing the number of research articles available on the RELX SDG Resource Centre

In 2022 we increased the number of research articles on the RELX SDG Resource Centre by 24% and added 650 new content items. We published 18 special issues in 2022 featuring curated articles, book chapters and other content on specific topics. This included a humanitarian special issue in the wake of the invasion of Ukraine and other crises which had more than 27,000 page views. Ahead of COP27 in November we also released a climate change special issue, which included a curated list of 110 Elsevier journal articles and book chapters to inspire positive environmental action and further climate research. We closed the year with more than 155,082 unique users, a 16% increase over 2021.

SDG 10 (Reduced Inequalities)

SDG 13 (Climate Action)

SDG 16 (Peace, Justice And Strong Institutions)

Enrich the SDG Resource Centre to ensure essential content, tools and events on the SDGs are freely available to all

Corporate responsibility governance

Good governance allows us to make appropriate decisions in a manner that weighs economic considerations alongside the risk and impact on our business operations and our stakeholders.

CR Governance and reporting

Our Board recognises the importance of maintaining high standards of corporate governance, which underpins our ability to deliver consistent financial performance, and value to our stakeholders, consistent with RELX's culture of integrity. The Board has oversight responsibility of RELX's corporate governance and their role and function is explained fully in the Corporate governance section (see pages 98 to 151). The Audit Committee of the Board regularly reviews ethics issues. In addition, the Chief Legal Officer (CLO) and Company Secretary is responsible for ethics issues as a member of the RELX executive committee. The Chief Compliance Officer and Corporate General Counsel reports to the CLO and presents to the Board annually on the status of our ethics policies and implementation.

Governing policies set out our stance on key issues and are publicly available at www.relx.com/cr-downloads. These include the RELX Code of Ethics and Business Conduct, the Code of Ethics for Senior Financial Officers, the Supplier Code of Conduct, Tax Principles, Privacy Principles, Inclusion and Diversity Policy, Health and Safety Policy, Editorial Policy, Quality First Principles and Product Donation Policy.

Our values

We monitor the progress of each business in embedding our values.

Customer focus

Valuing our people

Innovation

Passion for winning

Boundarylessness

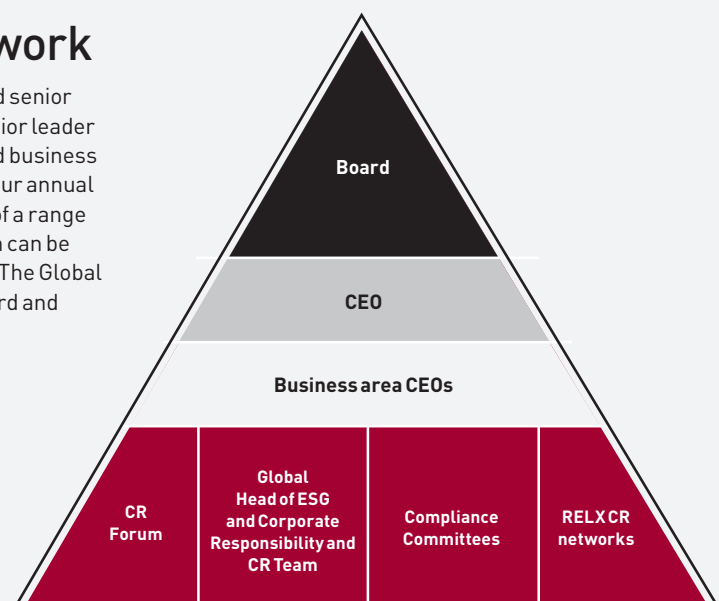

Hitomi Hibino
Assistant Company Secretary,
RELX

Strong corporate governance ensures a business has effective decision-making processes and controls in place so that the interests of all stakeholders are balanced. It is fundamental to the way RELX operates, and this is clearly visible in our culture of integrity and trust.

Our CR governance framework

The CEO has responsibility to the Board for CR. They and senior management, as well as the CR Forum, chaired by a senior leader and involving individuals representing key functions and business areas, set and monitor CR performance. This includes our annual and longer term CR objectives, which reflect the views of a range of internal and external stakeholders. More information can be found on www.relx.com/additional-cr-resources. The Global Head of ESG and CR provides formal updates to the Board and engages on key issues with senior managers, who have CR-related Key Performance Objectives (see page 126).

Helping our people pursue the highest ethical standards

RELX is committed to fostering a culture of integrity. Doing the Right Thing is more than a phrase at RELX, it embodies principles that represent RELX’s culture of integrity. It includes ensuring respect for one another; incorporating ethics in all our actions; growing our business with integrity; holding ourselves and each other accountable; and taking time to ask questions and report concerns.

Doing the Right Thing is underpinned by clear actions for employees, among them, being honest in our dealings with others; respecting the law, our policies and colleagues; and courageously speaking out for what is right. RELX in turn provides supporting training and resources; enables a culture where people can feel comfortable speaking up and experience no retaliation when they do; and ensures concerns are listened to and acted on in a fair and timely manner.

The pillars of our compliance activities are risk assessment; policies and procedures; training and communications; investigations and remediation; and monitoring of internal controls. Accordingly, the RELX Operating and Governance Principles describe the processes, policies, and controls to manage risk. We engage in a legal and compliance risk assessment twice a year to identify the top legal and compliance risks to the Company.

Our Code of Ethics and Business Conduct (the Code) sets the standards of behaviour for all RELX employees. Among other topics, the Code addresses fair competition, anti-bribery, conflicts of interest, employment practices, data protection and appropriate use of company property and information. It also encourages reporting of violations – with an anonymous reporting option where legally permissible.

We offer several reporting channels to report Code-related concerns, including an Integrity Line, available to employees, suppliers, and other reporting persons. The Integrity Line is managed by an independent third party and accessible by telephone or online 24 hours a day, 365 days a year. The Integrity Line also includes an Ask A Question feature which allows employees to seek ethical advice before taking action. Reports of violations of the Code or related policies are promptly investigated, with careful tracking and monitoring of violations and related mitigation and remediation efforts.

 The number of reports received is publicly available on our website www.relx.com/investors/corporate-governance/code-of-ethics

We maintain a comprehensive set of other compliance policies and procedures in support of the Code and our risk areas, which are reviewed and updated periodically to ensure they remain current and effective. We formally audit the compliance programme, including the Code, every three years. Our policies, including our anti-bribery policies, also comprise part of our adequate procedures for compliance with applicable laws. Full and part-time employees receive mandatory training on the Code – both as new hires and regularly throughout their employment – on topics such as maintaining a respectful workplace, preventing bribery and anti-competitive activity, and protecting personal and company data. Mandatory periodic training covers key Code topics and is supplemented by advanced in-person training for those in higher-risk roles or regions. Temporary staff and apprentices are also assigned training.

Key points: Ethics and compliance policies, training and tracking

 Read our Code of Ethics and Business Conduct at www.relx.com/cr-downloads

To help employees comply with applicable laws, we supplement the Code with other policies in areas critical to our business, including anti-bribery, competition, data privacy and security, trade sanctions and workplace conduct.

To facilitate understanding of the Code and our other policies we require cyclical mandatory training and use a range of communication tools, including video	We maintain compliance committees for all RELX business areas which help set and implement compliance initiatives for each business
---	---

We provide specialised training and webinars for colleagues in higher-risk roles and locations	The Code stipulates protection against retaliation if a suspected violation of the Code or law is reported
--	--

99.5% Completion rate for all courses within 90 days of issuance	13 Our Code of Ethics and Business Conduct is available in 13 languages
--	---

The Code and a related supplemental policy also address corporate political contributions, which are strictly prohibited except in the US, where such contributions and activities are permitted in certain states within allowable limits, if they comply with stringent reporting and disclosure regulations. Employees must obtain senior management approval for any proposed corporate political contributions; all corporate contributions are reported as required by law. Contributions are made on a bipartisan basis to support the progression of the company and no funds are donated for presidential campaigns.

We remained diligent in our ongoing efforts to comply with applicable bribery and sanctions laws and mitigate risks in these areas. Our anti-bribery and sanctions programmes include detailed, risk-based internal policies and procedures on topics such as doing business with government officials, gift and entertainment limits, gift registers, and complex sanctions requirements. Relationships with third parties and acquisition targets are evaluated for risk using one or more of the following methods, including; questionnaires, references, detailed electronic searches, and Know Your Customer screening tools. We monitor and assess the implementation of our anti-bribery and sanctions programmes by continually reviewing and updating our policies and procedures; conducting periodic programmatic risk assessments; and conducting quality reviews and internal monitoring and audits of the operational aspects of the programmes.

We engage with our employees about compliance through written communications and other media, such as short videos. To celebrate Compliance Week 2022, we developed articles and activities to demonstrate how employees contribute to our culture of integrity by highlighting specific examples from across our business areas.

Our Code of Ethics and Business Conduct supports the principles of the United Nations Global Compact (UNGC) and stresses our commitment to human rights. In accordance with the UN's Guiding Principles on Business and Human Rights, we consider where and how we operate to avoid human trafficking and modern slavery in our direct operations and in our supply chain.

 Our Modern Slavery Act Statement, available at www.relx.com, provides further details.

As a signatory to the UNGC, we support its principles, encompassing human rights, labour, environment and anti-corruption, in key policies including our Code and our Supplier Code.

Data privacy

Our commitment to data privacy remained a critical RELX priority during 2022. We conducted audits on the use of our Risk products by our customers, and continued to ensure that we structured relevant contracts to govern appropriate use of our products to protect individuals.

Dedicated privacy teams implemented requirements for compliance with emerging data protection regulations around the globe. In addition, RELX continued to advocate for clear national privacy laws that protect consumers, bolster consumer trust and allow businesses to invest in data-driven activities that serve the public interest.

Cyber security

We observed Cyber Security Awareness Month with both central and business specific initiatives aimed at improving security understanding for employees. This included an Ask Me Anything session with Chief Information Security Officers from across the Company and our fifth annual phishing awareness challenge for employees. Furthermore, in recognition of International Fraud Awareness Week, we hosted various employee events including a quiz and daily challenges. Throughout the year, we also contributed to industry knowledge by sharing appropriate learnings with the external security awareness community.

Pensions and investments

The Statement of Investment Principles for our UK pension scheme demonstrates that the Trustee recognises that consideration of financially material factors, including ESG and climate risk, is relevant at different stages of the investment process. As long-term investors, the Trustee embeds consideration of ESG factors in its investment decision-making as ESG factors can have a material impact on risk and return. The Trustee has produced a Responsible Investment Policy which has been shared with all managers. Throughout the year, the Trustee Board received presentations from ESG experts and set up a dedicated Responsible Investment Sub-Group.

Corporate responsibility issues are also relevant to the investment decisions made by RE Venture Partners, RELX's corporate venture arm. RE Venture has invested in sustainable food production, environmental education and the creation of inclusive content.

2022 PERFORMANCE

Support of SDG 16 through global activities for employees to raise awareness of data privacy and protection, including for Data Privacy Day

We increased activities during 2022 to bolster employee awareness of our commitment to data privacy and how they can act as responsible stewards of personal information we hold.

To promote Data Privacy Day 2022 we created and distributed a promotional video by our data protection officers and Chief Privacy Officer. On the day we also announced the winners of the annual RELX Privacy Champions contest and sponsored a Data Privacy Day quiz to spur colleagues to demonstrate their privacy knowledge.

We undertook additional Data Privacy Day awareness activities which included leadership messages and articles. Employee awareness privacy promotions continued during the year, with messaging in May about Privacy Awareness Week in the Asia Pacific region and globally about the fourth anniversary of the GDPR framework in the European Union.

2022 PERFORMANCE

Support of SDG 16 by expanding National Institute of Standards and Technology Cybersecurity Framework assessment reporting

All four operating divisions completed independent third-party assessments of their cybersecurity programmes measured against the National Institute of Standards and Technology Cybersecurity Framework during the year. RELX continues to enhance its controls in the five pillars of NIST CSF - Identify, Protect, Detect, Respond, and Recover. These assessments involve questionnaires and inspection of our cybersecurity governance and control implementation to judge efficacy and maturity.

During 2022, we enhanced our security programme, adding additional monitoring capabilities and implementing more mechanisms to ensure threat intelligence is shared in a meaningful way. We also enhanced our technical resilience capabilities to enhance our ability to respond to cyber-attacks.

A responsible taxpayer

Taxation is an important issue for us as well as our stakeholders, including our shareholders, governments, customers, suppliers, employees and the global communities in which we operate. We are transparent about our approach to tax. At www.relx.com/go/TaxPrinciples we provide details about our tax principles and global tax contribution – broken down by regions and categories – along with our tax risk control framework. There are also case studies showing how RELX has made a positive contribution in tax-related areas to benefit society as a whole. RELX is a signatory to the B Team’s Responsible Tax Principles.

Globally, in 2022, RELX paid £495m in corporate taxes, but also paid and collected much more in payroll taxes and indirect taxes.

2022 PERFORMANCE

Support of SDG 16 through continued advancement of African tax law codification pilots

Taxes provide governments with the essential revenue necessary for public services that benefit their citizens. Governments need codified tax laws to know when, how much and from whom they should be collecting. Citizens need codified and transparent tax laws to understand their liabilities and to advocate for fair collection and use of their remittances. Unfortunately, in many countries around the world, it is difficult for tax authorities and taxpayers alike to access tax law in a complete, up-to-date and consolidated form.

Working with LexisNexis Legal & Professional South Africa and the LexisNexis Rule of Law Foundation, in 2022, we progressed a project to produce and maintain a set of freely available consolidated tax laws in Ethiopia, our first pilot country, with a view to making tax laws more transparent and accessible to the government and its citizens. We aim to have substantially completed the project and expand to a second country in 2023.

2023 objectives	By 2030
<p>Security – SDG 16 (Peace, Justice and Strong Institutions): Successful completion and testing of technical resilience enhancement initiatives across business units</p> <p>Privacy – SDG 16 (Peace, Justice and Strong Institutions): Increase efficiency in fulfilling privacy requests at scale.</p> <p>Responsible tax – SDG 16 (Peace, Justice and Strong Institutions): Continue to advance African tax law codification projects</p>	<p>Continued progressive actions that advance excellence in corporate governance within our business and the marketplace</p>

People

We owe our success to RELX's talented employees, including researchers, technologists, event managers, product engineers, data scientists and many others. We depend on our employees and they count on us to create a fair, challenging, rewarding and supportive work environment where they can achieve their potential.

Our people

One of our five RELX values is valuing our people and for us that means creating an environment where our employees can do their best work and achieve our business objectives. This, in turn, helps us be an employer of choice, so that we can recruit and retain the best people.

We conduct regular employee opinion surveys across RELX and our 2022 Pulse Survey had the highest response to date with almost 30,000 employees responding. Our Net Promoter Score is a key indicator, as it asks employees if they would recommend working at RELX, which continues to improve. We have also maintained employee engagement at 98%. Through these surveys we continually ask for feedback and ensure we respond accordingly to keep RELX an excellent place to work for all our people.

All four of our business areas were included in the 2022 Comparably Best Global Company culture list, Elsevier was 5th, LexisNexis Legal & Professional 18th, RX 31st and LexisNexis Risk Solutions 36th. LexisNexis Legal & Professional was cited in Comparably's top 25 companies for career growth and LexisNexis Risk Solutions and RX received awards for best leadership teams. Kumsal Bayazit, CEO of Elsevier and Mike Walsh, CEO of LexisNexis Legal & Professional, were cited as two of the best CEOs for women and diversity.

Our workforce consists of over 35,000 people and seven years is the average length of service. 97% of our employees are full-time and 3% part-time, with the oldest employee being 86 years old. 1% of employees are temporary workers and we engage over 1,000 contingent workers. We estimate the total hours worked by all employees to be more than 63m in the year.

In 2022, our total turnover rate was 15.5%; the voluntary turnover rate was 13.1% and the involuntary rate was 2.4% reflecting the buoyancy of international labour markets.

Ronda Bazley Moore
Chief Inclusion and Diversity
Officer, LexisNexis Legal &
Professional

Building a positive workplace, one that is diverse and inclusive, is important because it means we can all be our best. It allows everyone to use their knowledge and skills to contribute to the success of the business while achieving their full career potential without unnecessary barriers.

35,000+ Employees worldwide	7 Average length of service in years

Training and development

We are proactive in helping our people to develop. Each year we undertake an organisational talent review that involves the CEO and other senior leaders identifying employee advancement opportunities. Employees have access to our global job board and can view and apply for available openings across the world.

Enabling Performance is our approach to personal development which reviews skills and achievements and identifies opportunities for recognition and advancement. Enabling Performance encourages regular and impactful performance, development and career conversations for all employees.

In 2022, we invested approximately \$15m in training (including courses, seminars, one-to-one instruction and tuition reimbursement) to develop the capabilities and future potential of our people. RELX employees engaged in approximately 400,000 training hours in the year, including time spent on our online learning platforms. We invest in leading digital learning for all employees to support their personal and professional development via mobile and other devices.

Career development is further supported by a global mentorship programme, NetWorx, that involves participants from across our business areas. The digital mentoring platform recommends matches based on individual profiles and specific goals, creating six month long mentoring relationships. In 2022, the platform supported more than 500 active mentoring pairs.

By the close of 2022, approximately 100 of RELX's top executives had either completed a Management Development Process or had their existing development plan revisited. This leads to precise actions for attaining present and future career objectives; provides an insightful view of the individual; and encourages openness, as sensitive issues are addressed in a spirit of confidentiality and respect. The Management Development Process involves in-depth interviews to assess strengths and development areas; agreeing an action plan with the individual and their manager on present role, skills and knowledge; and future career aspirations. Plans may include gaining international experience, focused coaching and engagement outside RELX where appropriate. Progress against development plans is regularly updated and checked by the CEO.

Reward

2022 PERFORMANCE

Advance reward education for people managers encompassing pay equity

Cascade newly developed, on-demand, reward eLearning modules to managers for real time access.

Reward education for people managers encompassing pay equity took place across our four business areas in the year. In addition, we launched on-demand reward eLearning modules for all people managers, with content added to onboarding materials for new managers.

We made online learning tools available across the business, which were referenced as part of the reward cycle and other leader and HR communications.

We have robust and well-established reward mechanisms across RELX, with a strong emphasis on performance, fairness and equity. In 2022, we introduced a programme of reward education for people managers to explain how our reward mechanisms operate and help build trust in reward.

In 2022, 45% of employees were eligible for variable pay through an annual incentive or commission plan.

We operate a number of different employee share plans including all-employee share purchase programmes in the UK and the Netherlands, which together represent approximately 20% of our employees. We will be rolling out a similar plan in the US in 2023, subject to shareholder approval at the 2023 AGM.

Performance targets associated with CR are embedded within our annual incentive framework to progress our annual and multi-year CR objectives.

Well-being and support

The global pandemic has had a long-lasting effect on how people work and we have many employees who are working from home most of the time. With this in mind, we have prioritised the physical and mental health of our people. We highlighted dedicated health and well-being resources available to all employees across RELX, maintained a network of more than 130 Well-being Champions, and marked World Wellbeing Week 2022 with events which highlighted health and well-being programmes and resources available to all RELX colleagues, including the Headspace app with mindfulness resources, and virtual fitness classes.

We offer employee assistance programmes to all our employees, providing professional counselling to help them and their family members with personal or work-related issues that may impact their health or well-being. This service is available 24 hours a day, 365 days a year.

Leave benefits

Our global HR information system covers approximately 99% of our workforce, allowing us to track absence. In the UK and the Netherlands, there was an absence rate of 1.14% (number of unscheduled absent days out of total days worked in 2022) for reasons such as sick, compassionate and unpaid leave.

In the US, there were 1,381 cases under the US Family Medical Leave Act, which provides up to 12 weeks of unpaid job protected leave in a 12-month period, including for the birth or adoption of a child, or to care for a family member or an employee's own serious health condition. RELX also offers a Modern Family Leave benefit to eligible US employees which provides up to 14 weeks of paid leave following the birth of a child or the placement of a child with the employee for adoption and up to 8 weeks of paid leave to care for an eligible family member with a serious health condition.

In the US, maternity leave is 14 weeks at full pay. In the UK it is 26 weeks' ordinary maternity leave.

Inclusion and diversity

2022 PERFORMANCE

Progress RELX inclusion goals, including reviewing external best practices for voluntary disclosures of gender identity, sexual orientation and disability

During 2022, we progressed our inclusion goals by introducing targeted initiatives encompassing training, development and recruitment. We commenced reviewing external best practices for voluntary disclosure by employees of personal diversity information. That review is continuing in 2023. In 2022, Elsevier launched a self-ID project for authors, building on an industry-wide initiative colleagues helped develop. More than 2.7m researchers chose to provide gender, race and ethnicity data as part of Elsevier's journal article submission process.

The importance of inclusion and diversity is enshrined in our Code of Ethics and Business Conduct. We prohibit discrimination. We recruit, hire, develop, promote and provide conditions of employment without regard to race, colour, creed, religion, national origin, gender, gender identity or expression, sexual orientation, marital status, age, disability or any other category protected by law. This includes accommodating employees' disabilities and religious beliefs and practices.

At RELX, inclusion and diversity is also about encouraging, supporting and promoting diversity of thought across the Company. This includes diversity of national origin, ethnic, and cultural backgrounds, as well as the other characteristics mentioned above such as gender, race, sexual orientation and religious beliefs. We derive competitive advantage from the breadth of backgrounds, diverse perspectives, opinions and differing ways of thinking that our employees bring to everything they do.

Our Inclusion and Diversity Policy builds on this and explains our commitment to a diverse workforce and an environment that respects individuals and their contributions. Practical action is driven by our inclusion strategy, and we have an Inclusion Council, composed of leaders from across our company, supported by a broader Inclusion Working Group with 240 participants. Our 2020-2025 inclusion goals, covering all aspects of diversity, guide our inclusion and diversity efforts. During 2022, we have progressed our inclusion goals through targeted initiatives encompassing training, development and recruitment.

Employee Resource Groups

RELX Employee Resource Groups (ERGs) encourage employees to collaborate, advocate and engage communities, furthering inclusion and diversity at RELX. In recognition of the important roles ERGs play in advancing a culture of inclusion, all employees have two days paid time-off per year to use for ERG-sponsored activities. In 2022, ERG recorded hours recorded grew to 11,000 hours. In 2022, certain ERGs were consolidated to maximise focus and impact. There are currently 69 active networks, focused on a range of inclusion priorities, including gender, race, ethnicity, age, LGBTQ+ and disability. Over 2,400 employees participated in our virtual inclusion and diversity conference, Be You, Belong, which ran over two days during Diversity Awareness Month. The event focused on how we can cultivate a sense of belonging across the Company. The event featured 97 speakers and over 21 hours of coverage, receiving an average employee satisfaction score of 9.3/10 and attendance increased by 124% compared to the previous year.

Gender

In 2022, the gender diversity of our senior leader population increased from 30% women at the end of 2021 to 31%, while our women people managers remained at 44%. With respect to our Board of Directors, at year end 2022, women comprised 40% of the Board, and Non-Executive Director Marike van Lier Lels serves as our Workforce Engagement Director.

We have implemented a range of initiatives to enhance the career development opportunities for women. In Risk, a bespoke Leadership Development Programme, Ignite & Accelerate, provided mentoring, coaching and sponsorship for 16 high-potential women in the year to move cross functionally and vertically, as well as into commercial roles. Since the programme started in 2019, 60% of the 45 women involved have been promoted, with a 90% retention rate. Risk also continued their women's mentorship programme which connected 400 people in the year. Elsevier kicked off the fourth cohort of the Developing Talent for Gender Equity programme and won the Women of the Future Corporate Award, with specific recognition for prioritising and aligning internal and external-facing initiatives encompassing advancing inclusion, diversity and equity in research and healthcare.

With some 10,000 technologists in our business, we need to attract the best talent for our current and future work. Of the approximately 8,000 technologists we employ, 25% are women. In 2022, we continued our Women in Technology internal mentoring programme. Senior women and men in technology serve as mentors to help high-potential women technologists advance. In 2022, there were 248 participants, a 143% increase from 2021. RELX is a signatory of the Tech Talent Charter, a non-profit organisation working to address inequality in the UK tech sector and in the year we contributed data in support of their Diversity in Tech report.

RELX is a signatory to the Women's Empowerment Principles, a United Nations Global Compact and UN initiative to help companies empower women and promote gender equality. We comply with employee-related reporting requirements, and our business areas publish UK gender pay gap reports as required by UK legislation. They can be found at www.relx.com/corporate-responsibility/engaging-others/policies-and-downloads/local-reporting-requirements.

We marked International Women's Day 2022 with a panel discussion featuring Feraye Ozfescioglu, CEO of the World Humanitarian Forum, Philippa Scarlett, Head of Global Government Affairs at RELX, and Gemma Hersh, SVP, Global Academic and Government Sales at Elsevier who discussed their career paths, future ambitions, and practical advice to help women achieve their ambitions.

Race and ethnicity

Ethnic minority representation in the US and UK was 27%, two key jurisdictions which account for approximately 57% of our employee base. Ethnic minority senior leaders increased to 12% while ethnic minority managers stayed consistent at 19% in 2022. With respect to our Board of Directors, at least one member is from a minority ethnic background, in line with the UK Parker Review.

We have a number of initiatives underway that focus on race and ethnicity. Risk launched Emerge and Evolve, a talent development programme for ethnically diverse talent with 31 employees in the first cohort. The programme will enable visibility, enhance core leadership skills and offer coaching to prepare employees for more senior roles in the organisation.

Ethnicity of US/UK employees

Ethnicity of US/UK managers

Ethnicity of US/UK senior leaders

Elsevier implemented a Developing Talent for Minority Equity programme for 36 colleagues from nine countries designed to expand opportunities in senior leadership for underrepresented talent.

In 2022, Legal expanded its fellowship programme in partnership with its African Ancestry Network ERGs and the LexisNexis Rule of Law Foundation, with a 50% increase to 18 fellowship candidates and funding of \$180,000 to Historically Black College or University Law School Consortium students. The Fellows spent nine months developing their leadership skills and working with LexisNexis colleagues on projects focused on eliminating systemic racism in our legal system and advancing the Rule of Law.

Exhibitions partnered with two organisations to increase the diversity of its talent searches: OneTen in the US sources Black candidates who have outstanding work experience but no college degree and Black Young Professionals (BYP) Network helps raise awareness of the RX brand in order to attract Black talent to the business. Senior leaders from RX in the UK and US will mentor ten BYP job candidates through the network's Mentorship Programme in 2023.

LGBTQ+

RELX scored 99.1% in the 2022 Workplace Pride Benchmark, receiving the Advocate designation for LGBTQ+ workplace inclusion. We celebrated Pride Month 2022 with ERG activities across the Company including participation in the London, Atlanta and Chennai Pride Parades, and a panel discussion hosted by Mark Kelsey, CEO LexisNexis Risk Solutions, on the importance of LGBTQ+ visibility at senior levels.

We are a member of the Open for Business Coalition which promotes the economic case for LGBTQ+ inclusion. In 2022, we supported the Coalition's South East Asia programme aimed at improving the social and legal situation for LGBTQ+ people in the region, gathering local data and insights to support LGBTQ+ inclusion.

The 2022 Elsevier Rising TIDE (Tomorrow, Inclusion, Diversity, and Equity) for Pride programme took place with 44 participants. New and early-career Elsevier employees who identify as members of the LGBTQ+ community are paired with more senior colleagues who identify as LGBTQ+ or allies for mentoring and support during a six-month period.

In 2022, RELX signed The Business Coalition for the Equality Act, a group of leading employers in the US that support the Equality Act, federal legislation to provide the same basic protections to LGBTQ+ people as are provided to other protected groups under federal law. The Human Rights Campaign gathered signatures from over 500 companies which have signed the Business Statement Opposing Anti-LGBTQ State Legislation opposing legislation aimed at restricting the rights of LGBTQ+ people.

Disability

Our Enabled ERGs champion disability inclusion across our business areas through training, events and mentoring. Disability Fundamentals is our online interactive training for managers and colleagues to learn about disability awareness, disclosures and accommodations.

The RELX CEO is a signatory to the Valuable 500, a global CEO community revolutionising disability inclusion. In 2022, we celebrated the International Day of Persons with Disabilities with sessions looking at how to create a safe and welcoming work environment for people with disabilities, including making meetings accessible for all colleagues.

In 2022, Risk signed up to the Neurodiversity in Business charter, a business forum for organisations to share industry good practice on neurodiversity recruitment, retention and empowerment.

Elsevier launched their Enabled Mentoring Programme in the year, matching seven pairs of employees who have a disability, including those who are new to the organisation or those who have been recently diagnosed with a disability. The aim is to foster confidence at work. Elsevier also continued its partnership with the Business Disability Forum which works to remove barriers to inclusion.

Legal earned the top score of 100% in the 2022 Disability Equality Index. It runs Project Empowerment, global training on how to successfully embed accessibility into our products. In 2022, 13 training sessions focused on improving product inclusion and since launching in 2021, over 300 people have been trained.

Inclusive workplace

Across the business, inclusive workplace training encompassed inclusive leadership, as well as unconscious bias with small group discussions to highlight situations that can adversely impact colleagues and team achievements. In the year, psychological safety facilitators delivered workshops for managers and their teams. We capture psychological safety data through surveys with a support process to aid teams with low scores and additional intranet resources available for all participants.

Our Inclusion and Diversity Policy is available at

 www.relx.com/cr-downloads.

2020-2025 Inclusion goals

Gender: Increase the percentage of women in management, senior leadership and technology roles over time

Race and ethnicity: Increase the racial and ethnic diversity of our workforce over time

LGBTQ+: Foster an LGBTQ+ supportive workplace tracked through employee surveys

Disability: Foster a disability supportive workplace tracked through employee surveys

Inclusive workplace: Establish minimum global standards in areas such as flexible working and leave benefits; continue impactful global inclusion training and track effectiveness, including through employee surveys; engagement on inclusion across RELX, with leadership involvement and grassroots employee participation, including through ERGs

Health and safety

2022 PERFORMANCE

Review safety risk assessment and training modules to cover three working models – office, home and hybrid

In the year, we reviewed various modes of working post-pandemic. We moved to a new training provider to allow each user to complete just one risk assessment based on a personalised profile of their working arrangements, whether that is working from home, the office or hybrid. The new system is also linked to our global HR information system, Workday, to improve efficiencies. We will expand a 2022 trial across the UK and Netherlands and other geographies.

The importance of employee health and safety is emphasised in the RELX Code of Ethics and Business Conduct and also in the RELX Health and Safety Policy, both available on www.relx.com. These documents commit us to providing a healthy and safe workplace for all employees, as well as safe products and services for clients. The CEO is responsible for health and safety on behalf of the Board.

Good health and safety practice is reinforced through a network of Health and Safety Champions reporting to business area CEOs. They receive support from health and safety managers and other colleagues in the business, encompassing bimonthly calls, a Health Resources page on our intranet site, and an annual Health and Safety Champions meeting. We consult with employees globally on health and safety through staff and works councils. Adopting a risk-based approach, we have dedicated safety committees at relevant locations that meet monthly (or as needed) to review safety concerns and any incidents.

We provide tailored health and safety training to employees at higher risk of injury in the workplace, including warehouse, facilities and sales employees who regularly lift or carry products. In the US, we engage a third-party specialist to inspect locations that had high incident rates in the previous year. Locations outside the US must follow local regulatory frameworks and we continue to harmonise local reporting with our global health and safety reporting guidelines.

We provide employee support following any incident. For example, in the US, we work with a third-party resource to assign a nurse case manager to each complex or severe claim, who works with the employer, employee and treating physician to get an employee back to health in the shortest possible time.

With many employees continuing to work from home, we ensured regular communication to help employees understand the importance of good posture, correct home set-up and positive working routines. Increased home working and reduced travel due to the pandemic resulted in significantly lower accidents in the year. There were no work-related deaths reported in 2022.

In our Exhibitions business we have specific safety risks, including working at height, heavy lifting and using forklifts. At UK-based exhibitions we run accredited health and safety management training for operational staff to ensure they can appropriately respond to any incident.

Working across many different countries where health and safety standards vary is a challenge in the events industry. Together with peers, Exhibitions endorses the g-Guide which sets out standards to safeguard the health and safety of people working at or visiting an event or exhibition, and uses illustrations to reinforce key points and overcome language barriers.

2022 H&S performance (frequency rate)

2022 H&S performance (lost time) cases by type

Accident reporting covers 82% of employees

2023 objectives

Inclusion – SDG 10 (Reduced Inequalities): Expand Women in Tech Mentoring programme with more pairings

Well-being – SDG 3 (Good Health and Well-Being): Relaunch Fit2Win global employee fitness competition

By 2030

Continued high-performing and satisfied workforce through talent development, D&I and well-being

Customers

We recognise that the growth and future of our company is dependent on our ability to deliver information-based analytics and decision tools in a sustainable way to customers.

Improving customer outcomes

Our goal is to improve outcomes for our customers by providing information-based analytics and decision tools for professional and business customers that benefit their daily work.

In 2022, electronic products and services accounted for 83% of revenue, up from 37% in 2006.

Editorial standards

Maintaining the integrity of what we publish is vital to the trust of customers and other stakeholders. Our Editorial Policy, available to all staff (and publicly available on www.relx.com/corporate-responsibility/engaging-others/policies-and-downloads), makes clear our respect for human rights and encourages pluralism of sources, ideas and voices.

To ensure the quality of scientific papers submitted to Elsevier, primary research journals undergo peer review. This means that once received from an author, editors send papers to specialist researchers in the field. In most disciplines, this is done anonymously. In some cases, the process is 'double blind,' where both the reviewer and the author are anonymous, to limit bias based on an author's gender, country of origin, academic status or previous publication history. It may also help ensure that articles written by renowned authors are considered on the content of their papers, rather than their reputation.

In 2022, Elsevier launched the Peer Review Workbench (PRW), a new tool for the growing field of research on research. Researchers and academics can use the platform to apply to access metadata for manuscripts in Elsevier journals in order to run systematic analyses on peer review processes in different disciplines at scale. The PRW aims to address the need for further transparency in, and evidence-based studies on, the journal editorial and peer review process, in pursuit of continuous improvement for research, science and society.

In the year, Elsevier enabled the automatic sharing of peer review metadata by offering a feed of peer review information from our submission and peer review system Editorial Manager (EM) to Open Researcher and Contributor ID (ORCID) after the peer review process has been completed. ORCID is a not-for-profit, cross-publisher organisation that enables transparent and trustworthy connections between researchers, their contributions, and their affiliations. It provides researchers with a unique ID which they can connect with their professional information. The peer review section on an author's record lists their peer review activities across journals and publishers, a simple way to showcase their reviewing work to peers and institutions. Data is supplied directly by participating publishers and cannot be entered manually, which ensures data is reliable and valid.

 Read more about peer review at www.elsevier.com/reviewers/what-is-peer-review

Elizabeth Crossick
Head of Government Affairs,
EU, RELX

Artificial Intelligence (AI) has the potential to transform lives, improve diagnostics and deliver education. It's exciting to be able to use it as a force for good but with opportunity comes responsibility. Our customers need to trust us, and to know that we are thoughtful and serious in how we deploy AI and that is why our use of AI is governed by our responsible AI Principles.

► **83%**

In 2022, electronic products and services accounted for 83% of revenue, up from 37% in 2006

2022 PERFORMANCE

Support of SDG 17 by publishing and launching the RELX Responsible Artificial Intelligence Principles

As data science and artificial intelligence (AI) are increasingly applied across RELX to improve customer outcomes and business processes, we have created the RELX Responsible AI Principles to guide their use. These were published in 2022 and are publicly available at www.relx.com/corporate-responsibility/engaging-others/policies-and-downloads.

We also published a RELX position paper on AI to set out our position on a number of public policy challenges related to AI, and launched an address alongside the AI Principles which anyone can use to provide feedback or raise queries: ResponsibleAI@relx.com.

Publication of the AI Principles is an important aspect of being responsible stewards of data, while supporting our customers in making responsible decisions. They are being implemented across our business areas. For example, the Responsible AI & Data Science (RAIDS) team at Elsevier have trained over 50 RAIDS Champions in 2022, developed an algorithmic impact assessment and produced a self-service resource hub to assist team leaders in deploying the principles.

Because AI is evolving at unprecedented speed and scale, the AI Principles will be updated over time, based on colleague and customer feedback and experience, as well as industry and legislative trends.

The RELX Responsible AI Principles enable teams throughout the solution lifecycle to create better customer outcomes and build trust.

Emili Budell-Rhodes

Lead Evangelist, Engineering Culture
LexisNexis Legal & Professional

Digital knowledge and innovation: advancing customer goals

Across RELX, we work to address customer challenges through digital innovation.

Risk

ICIS, part of Risk, is a global provider of chemical and energy market intelligence. In 2022 ICIS launched Supplier Carbon Footprints to help companies measure, manage and identify opportunities to reduce global supply chain emissions for chemicals and plastics with ground-breaking emission data by supplier, plant, and product. Developed in partnership with Carbon Minds, Supplier Carbon Footprints provides emissions insights for 71 chemicals and plastics. Because emissions vary widely between supplier, region and plant, the tool provides more accurate findings than emissions calculated solely on a regional or country basis. With Supplier Carbon Footprints, organisations can clearly measure and compare the climate impact of their supply chains.

Scientific, Technical & Medical

Elsevier continued to improve its flagship clinical reference solution, ClinicalKey, to further streamline access to evidence-based information clinicians need to make informed decisions. In addition to single sign-on access added in the year, its auto-suggest capability was improved to include direct links to books and journals to enrich the user's search experience. 126 new topics were added to the clinical overviews feature, medical topic synopses to assist in decision-making at the point of care, bringing the total to over 1,500.

Legal

In 2022, Legal enhanced Lexis+ with Fact & Issue Finder, a practice-specific feature that enables legal professionals to build legal strategies centred around the facts, issues and topics of their case, allowing litigators to generate precise, actionable search results and reducing time spent researching and compiling data from multiple sources.

Developed using feedback from customer interactions, Fact & Issue Finder mimics the processes that legal professionals perform when researching cases, enhancing the research experience with the use of search and machine-learning technologies, streamlined workflows and data visualisations. A single search can gather case law, practical guidance, verdicts and settlements, expert witness analytics, and unique practice-specific content, with the aggregated information displayed via an interactive dashboard.

Exhibitions

RX enhanced the power of its face-to-face events by launching Emperia in 2022, its smart, contactless mobile app for fast lead capture. Exhibitors can record visitors' contact details and interests by scanning their badge. They can also rate leads according to priority and download them in real time for faster follow-up. At the 2022 PGA Show in Orlando, the industry's biggest annual golf business event, over three-quarters of exhibitors used Emperia, generating over 40,000 connections. The average number of leads was 97, and the highest over 600.

Responding to customer needs

Listening to our customers allows us to deepen our understanding of their needs and drive improvements. We do this through regular surveys, customer dashboards and feedback mechanisms. With input from customer insight teams across our Company, we calculated a RELX-wide customer satisfaction metric showing that in 2022, 87.5% of customers would recommend working with RELX.

Access to information

In Primary Research we offer two separate payment models for our science and medical journals to suit author preferences: pay-to-read articles funded by payments for reading made by individuals or institutions; and pay-to-publish (commonly known as open access) funded by payments for publishing made by authors, their institutions or funding bodies, with the research freely available to read by all upon publication. We offer a range of pay to read and pay to publish options, both subscription-based and transactional. Nearly all of our over 2,800 STM journals enable open access publishing. We welcome debate in government, academic and library communities regarding the mechanisms by which scientific outputs should be openly available and continue to create new access options together with industry partners.

Our authors also have the option to make their accepted manuscript available. In addition, we are a founding partner of Clearinghouse for Open Research (CHOR) which enables public access to funded research. CHOR utilises publishers' existing infrastructure for discoverability, search, archiving and preservation of scientific and medical research articles, and it is now integrated into the ScienceDirect platform. Furthermore, members of the public can read Elsevier's peer-reviewed content

through walk-in access at public and academic libraries around the world. Our ScienceDirect platform is available to the public through onsite user access from any participating university library or UK public library via the Access to Research programme.

Providing access in countries with low resources is a priority for us. Through Research4Life, more than 10,500 institutions in over 125 low- and middle-income countries receive affordable access to up to 194,000 peer-reviewed resources. Elsevier is a founding partner, providing around 15% of the content in Research4Life, as well as access to our abstract and citation database Scopus. Since the programme began, our trainers have run over 90 workshops for Research4Life librarians to ensure that they are equipped to make effective use of the resources provided through the programme. The Head of the Elsevier Foundation and VP Corporate Responsibility, served as Vice Chair of the Research4Life partnership from June 2020 to June 2022.

Bringing science into society

We work closely with journalists to ensure that research findings are accurately and effectively communicated to the public, and that authors receive credit for their work. A number of journalists receive free access to all Elsevier publications via Elsevier's Media Access programme.

Researchers who published an outstanding peer-reviewed article that has significantly impacted people's lives around the world, or has the potential to do so, are recognised with the Elsevier Atlas Award. The articles are made freely available and translated into everyday language, while author interviews are made public to encourage the dissemination or implementation of their findings. Content is linked to the SDGs and is featured on the RELX SDG Resource Centre.

2022 PERFORMANCE

Support of SDG 8 and SDG 16 by creating tools to enable customer-facing staff to share information about RELX and CR

During 2022, we launched a story summarising our approach to CR with key performance information available to employees and others at www.stories.relx.com/corporate-responsibility-2021/index.html.

We have also worked with Elsevier's Osmosis, an innovative digital health education platform, on an engaging film to enable our colleagues to discuss our focus on CR with customers and peers. The focus is on articulating how CR underpins how and what we do, beginning with our unique contributions as a business, and what we can uniquely contribute to our customers and society. It makes the link with the 17 UN SDGs and highlights how we set, measure and report on annual and longer-run ESG targets.

In the year, we also created a new SDG 16 (Peace, Justice and Strong Institutions) gateway on the RELX SDG Resource Centre which brings together examples of tools and projects across the business that can help advance the Rule of Law.

See www.sdgresources.relx.com/sdg-goal-16-peace-justice-and-strong-institutions.

SDG 16
 PROMOTE PEACEFUL AND INCLUSIVE SOCIETIES FOR SUSTAINABLE DEVELOPMENT, PROVIDE ACCESS TO JUSTICE FOR ALL & BUILD EFFECTIVE, ACCOUNTABLE AND INCLUSIVE INSTITUTIONS AT ALL LEVELS

RELX's strong commitment to advancing SDG 16 is a spur to corporate action on the transformational governance needed to foster integrity, fairness and inclusion.

Michelle Breslauer

Senior Manager, Governance & Peace, UN Global Compact

We partner with the US National Library of Medicine on the Emergency Access Initiative to provide temporary free access to full text articles to healthcare professionals, librarians and members of the public affected by disasters, providing essential resources in times of emergency. The Elsevier information centre on the novel coronavirus (SARS-CoV-2) and Covid-19 allows researchers, clinicians and patients free access to early-stage and peer-reviewed research on Covid-19. The Monkeypox Information Centre is helping healthcare professionals navigate outbreaks and includes evidence-based clinical resources, including clinical overviews, patient education and drug monographs; all content is freely available and regularly updated.

In the year, to aid Ukrainian researchers, Elsevier sponsored personal research support via a grant administered by the Polish National Academy of Sciences. We offer free resources to Ukrainian researchers via our Ukrainian Academic Support resource page where researchers can access waived and reduced author publishing charges for open access journals and get access to publishing resources on Researcher Academy. They can also register for free access to ScienceDirect, Scopus, and SciVal as well as clinical resources such as ClinicalKey, Complete Anatomy and Osmosis. To support Ukrainian journal editors, we worked with the Polish Academy and the Ukrainian Council of Young Scientists to deliver a workshop, covering editorial skills, ethics, peer review and journal promotion.

Elsevier's Library Connect programme, including a website, newsletter, events and online social media channels, as well as a new Library Connect Academy, provides library and information science (LIS) professionals worldwide with opportunities for knowledge sharing. As of 2022, we have 60,000 LIS professionals globally subscribed to our Library Connect Newsletter, a complimentary publication covering LIS best practices, trends and technology. More than 28,000 people subscribed to the Library Connect webinar channel and approximately 1,800 people attended live or recorded Library Connect webinars.

During 2022, the Library Connect website, containing articles, infographics, videos and other resources, received over 30,000 visitors. The Library Connect website is currently ranked sixth in the top 90 librarian blogs and websites for librarians by Feedspot, a content aggregator for blogs and websites. Librarians and researchers continued to enrol in Library Connect Academy receiving training in a range of LIS fields.

Accessibility

We strive to empower all people, including persons with disabilities, by ensuring our products and services are accessible and easy to use by everyone. Our commitment to accessibility is embedded across RELX and advances our Inclusion Policy. We follow the Web Content Accessibility Guidelines (WCAG 2.1 level AA).

We maintain an Accessibility Policy that highlights industry standards and tools to embed accessibility into our products and our business operations. We apply best practice from the RELX Accessibility Policy across hundreds of digital products and websites.

Our Accessibility Policy is available on www.relx.com/cr-downloads.

Risk employees continued enhancing our A11yCAT tool to help developers address accessibility bugs in real time.

Elsevier's Health Education Systems Incorporated (HESI) Delivery Operations team continued to work with HESI testing candidates that register to take a HESI exam remotely via our remote proctoring vendors. Since 2019, the team has processed more than 600 candidate accommodation requests, ensuring that these candidates have an accessible and inclusive experience.

In 2022, members of the Accessibility Working Group logged over 240 accessibility projects and Elsevier's Global Books Digital Archive fulfilled more than 3,300 disability requests, 87% of them through AccessText.org, a service we helped establish. Elsevier continued to enhance the accessibility of EPUB books by partnering with Benetech to move toward Global Certified Accessible status. Additionally, we continued work towards providing fully inclusive journal articles and book chapters in PDF format.

We worked with disability services offices, procurement officials, and instructors across the world to provide Voluntary Product Accessibility Template (VPAT) and Accessibility Conformance Reports. Customers can also utilise the accessibility@relx.com inbox to connect with an accessibility expert and make VPAT and report requests. In the year, LNL&P's Accessibility UX team generated VPATs for 36 products (21 of them new). We also offered a VPAT service package to help internal teams understand where they rank against accessibility standards compared with other products.

In 2022, ScienceDirect marked the 21st anniversary of including people with disabilities in design and usability testing with a new study to improve the user experience for people with visual impairments and launched new accessible features such as the first open access video journal, ScienceTalks, with closed captions and a fully accessible media player, the AblePlayer. Colleagues also released the first batch of accessibly tagged PDFs for 400 journal titles.

We promoted accessibility to outside companies and vendors throughout the year. RELX accessibility teams partnered with external content providers, including Highcharts, OAK, and Pendo, to advance accessible solutions for public benefit. Elsevier has collaborated with Highcharts for over seven years to continually improve the accessibility of its widely used chart library. In the year, we conducted research into scatter plots and large data sets and experimented with sonification, tactile displays and AI descriptions.

In 2022 we also celebrated the fourth RELX Accessibility Leadership Awards to showcase employees who demonstrate exceptional leadership in advancing accessibility, with winners announced on the International Day of Persons with Disabilities.

▶ 240+

Accessibility projects logged by the Accessibility Working Group

▶ 3,300+

Elsevier's Global Books Digital Archive fulfilled 3,383 disability requests

2022 PERFORMANCE

Support of SDG 10 by advancing cross-business, on-demand accessibility training

In the year, accessibility training took place across the business areas.

Elsevier continued its belting programme in 2022 with 37 employees completing 14 training modules to receive yellow belts. Over the last five years, 244 Elsevier colleagues earned yellow belt accessibility status, equating to over 6,000 hours of training across 25 locations. The accessibility team launched an introduction to web accessibility module in the year, as part of the onboarding process for new technology hires, and hosted an accessibility guild with a Slack accessibility channel for over 300 members.

To equip teams to use inclusive design best practices in their daily work, Elsevier ran inclusive design training sessions open to anyone whose work touches product, content, or platform development. In 2022, over 190 employees participated, including software engineers, content authors and product managers. An Inclusive Design Toolkit also launched to provide practical tools that can be embedded into product workflows to create more opportunities for inclusion.

Legal conducted Project Empowerment training for teams globally, with over 300 people taking part across 13 sessions in 2022. Project Empowerment focuses on embedding accessibility throughout agile workflows and ensuring products and services comply with applicable accessibility laws and international standards to support those with accessibility needs.

Project Empowerment is an important cultural change within our organisation. By learning more about accessibility, it empowers our agile teams, and leverages shared strengths through creative uses of technology and better understanding of social inclusion for people with disabilities.

Min Xiong

Chief of Staff, User Experience, and Chair and Founder of LexisNexis Enabled Disability ERG
LexisNexis Legal & Professional

2023 objectives

Customer engagement – SDG 17 (Partnership for the Goals): Strengthen Corporate Responsibility and sales team engagement

Quality – SDG 8 (Decent Work and Economic Growth): Roll out AI Principles across the business

Accessibility – SDG 10 (Reduced Inequalities): Expand Accessibility Champions model across RELX

By 2030

Continue to expand customer base across our four business areas through excellence in products and services, active listening and engagement, editorial and quality standards, and accessibility; a recognised advocate for ethical marketplace practices

Community

Contributing to our local and global communities is a responsibility and an opportunity.

RELX Cares, our global community programme, supports employee volunteering and giving that makes a positive impact on society. In 2022, we made a gradual return to face-to-face volunteering and fundraising, while also continuing remote activities.

The mission of RELX Cares is education for disadvantaged young people that advances one or more of our unique contributions as a business. Employees have up to two days' paid leave per year for their own community work. A network of over 240 RELX Cares Champions ensures the vibrancy of our community engagement.

In 2022, we held the 12th Recognising Those Who Care Awards to highlight colleagues who made outstanding contributions to their community during the pandemic. The winners – eight individuals and two teams – each received a cash sum to donate to the charity of their choice and were awarded additional volunteering days.

Each September, we hold RELX Cares Month to celebrate our commitment to our communities around the world. During the Month, over 3,000 colleagues across the Company took part in hundreds of volunteering and fundraising events.

During RELX Cares Month, colleagues engaged in activities ranging from fitness challenges including Risk's You Move, We Donate; Elsevier India's visit to a primary school to distribute stationery items for low-income children; US legal colleagues used Cares hours for beach clean-ups; and RX China colleagues held a walkathon to support educational services for children with autism.

In the wake of the Russian war in Ukraine, we gave approximately \$1m, including to UNICEF, Red Cross, World Central Kitchen, the LexisNexis Rule of Law Foundation, and Hope and Homes for Children, to provide vital humanitarian assistance. We also provided refugee assistance and in-kind product access to people affected by the conflict. Elsevier colleagues received three extra RELX Cares day in order to volunteer for charities aiding Ukraine.

Ganesh Venkatesan
VP, Orders Renewals and
Fulfilment and RELX Cares
Champion, Elsevier

I am passionate about giving back to the community since I feel providing education and healthcare to the disadvantaged helps improve their lives, society and the environment in general.

► **240+**

A network of over 240 RELX Cares Champions ensures the vibrancy of our community engagement

The mission of RELX Cares is education for disadvantaged young people that furthers one or more of our unique contributions as a business, including universal, sustainable access to information.

2022 PERFORMANCE

Continue to improve impact measurement of our charitable donations

As part of our ongoing efforts to understand the impact of our charitable contributions, in the year we explored how we can better capture outcomes resulting from our giving. We used the annual Business for Societal Impact (B4SI) Global Benchmark, to which we contribute, as a reference point. The Benchmark provides insight into global trends in community investment and allows us to assess our performance against other companies.

We expanded impact data we collected to encompass a broader range of our giving and will widen it further in 2023. Impacts included how grants allowed charities to improve existing services or provide new ones, spend more time with clients, and improve their external profile.

Measuring the impact of community investment is vital to ensure that a company understands the difference they are making to the communities they are supporting.

Clodagh Connolly
B4SI Global Director

Giving

Our central donations programme aligns with the RELX Cares mission. Employees serve as sponsors for charities seeking funding, which must in turn indicate how they meet one or more of RELX's unique contributions as a business including protection of society and reducing inequalities, advancing science and improving health outcomes, furthering the Rule of Law and access to justice and fostering communities.

RELX Cares Champions vote on the submissions using decision criteria such as value to the beneficiary and opportunities for staff engagement. In 2022, RELX Cares Champions donated \$250,000 to 22 charities supporting over 15,000 young people. Projects included:

- Creation of a children's corner in a library in Zambia where 42% of the population are living in extreme poverty
- Legal advocacy and education for low-income children and families from underprivileged communities in Los Angeles, USA
- Improving learning for young people in rural India affected by school closures during the pandemic
- A weekly group intervention programme designed to support pregnant and parenting teen girls in Philadelphia, USA
- Providing girls in rural areas of Ghana with education in STEM (science, technology, engineering and maths) education
- A mentoring programme for at-risk young people in New South Wales, Australia

The LexisNexis Rule of Law Foundation (LNROLF) continued work with the Liberian charity, Agents of Positive Change, focused on children's rights and solving illiteracy. The LNROLF built on an initial \$10,000 RELX central donations grant with additional employee contributions, which allowed a shipping container to become a library for a rural Liberian village in 2021; in 2022, in response to the local community's changing needs LNROLF worked with a US partner to train teachers and transform the space into a school for 52 students.

In managing community involvement, we apply the same rigour as in other aspects of our business. Following the B4SI – formerly LBG methodology – a global standard for measuring and reporting corporate community investment, we conduct an annual Group Community Survey with RELX Accounting Services and RELX Cares Champions. It divides our aggregate giving into short-term charitable gifts, ongoing community investment and commercial initiatives of direct business benefit.

During the year, we worked with B4SI, where we are members, to ensure we effectively apply the organisation's methodology for valuing in-kind contributions; B4SI subsequently assured our use of the reporting methodology. The assurance statement is available at www.relx.com/additional-cr-resources.

We donated £6.5m in cash (including through matching gifts), and £15.7m in products, services and staff time in 2022. Some 36% of employees, despite continuing pandemic restrictions in some locations, were engaged in volunteering through RELX Cares. According to 2022 B4SI data, the average volunteering rate was 21% for our sector and 7.3% for all sectors.

We continued to engage in skills-based volunteering, applying business knowledge and expertise to benefit communities in the year. For example, in the US, Legal colleagues volunteered over 1,100 hours to support the second cohort of the LexisNexis African Ancestry Network and LexisNexis Rule of Law Foundation Fellowship. Volunteers supported Fellows in areas such as editing and content development and helped them publish their projects in the journal, Increasing Equity in the Legal System.

Throughout 2022, we encouraged in-kind contributions, such as product and equipment donations, aligned with our Product Donation Policy (available at www.relx.com/cr-downloads). We also contributed over 146,000 books to Book Aid International (BAI) and Books for Africa worth over \$10m. In addition, 25 Risk colleagues helped with preparing content for publication and testing their new website.

Community involvement

What we contributed in 2022 (cost)

Engagement

Given the ongoing need to work remotely in many parts of the world in 2022, we continued to allow employees to use RELX Cares hours to volunteer in creative ways, relaxing the requirement that they only be used in connection with registered charities, and looked at ways to encourage people to continue to volunteer.

In the year, we held our 17th RELX Cares Challenge to encourage employees to use their two volunteer days to make a difference and foster broader participation in the local community. Colleagues from across the Company submitted ideas for new or extended business-sponsored volunteer activities that fit the RELX Cares mission and five were chosen by RELX Cares Champions. Two winners were Elsevier Chennai, which won \$4,000 for the Hope Foundation to provide free English lessons to primary school pupils and RX Ho Chi Minh which won \$4,000 for Go Vap District Association of the Blind which supports the visually impaired to access education and employment.

We asked colleagues who used their RELX Cares hours to record videos to encourage others to do the same. We used the video clips for a launch film for our global RELX Cares Month in September.

During RELX Cares Month, we resumed our Global Book Drive competition encouraging colleagues to donate books for local charities. Employees donated more than 2,500 books; Legal in Paris collected the most books and won \$500 for the charity of their choice and the Risk office in Duluth collected the most books per employee and won \$1,000 for their chosen charity.

Jeffrey P Mladenik and Andrew Curry-Green Memorial Scholarship

As a lasting memorial to our colleagues Jeffrey Mladenik and Andrew Curry-Green, who lost their lives on 9/11, we offer scholarships in their name to children of eligible employees.

Kira Young (left) is the daughter of Mani Young, VP Product Management for Risk in Alpharetta, Georgia. At her high school, Kira was the president of their chapter of the Family, Career and Community Leaders of America, the National Honour Society and Habitat for Humanity. She was an active member of a range of societies and clubs including the Georgia School Boards Association's Youth Advisory Council, and she received a Human Services/Education School Student of the Year Award. Kira has created her own website focusing on Mental Health Awareness called The Power of Okay. Kira is attending Emory University in 2022.

Brennan Patterson (right) is the daughter of Brent Patterson, a Technical Consultant for Risk in Springfield, Ohio. Brennan graduated as valedictorian from her high school where she was the president of the Leo Club, The National Honour Society and The Student Government. Brennan is an active fundraiser and advocate for congenital heart disease (CHD), hosting charity 5k runs, and staff vs student volleyball games to raise funds for Conquering CHD Ohio, she also succeeded in getting a CHD awareness week recognised by the Mayor of Springfield. Brennan is attending Purdue University in Indiana where she is studying psychology and forensics in the hopes of becoming a prosecutor.

Impact

In accordance with the B4SI model, we monitor the short and long-term benefits of the projects with which we are involved. We ask beneficiaries to report on their progress to increase transparency and engagement.

In addition, we survey RELX Cares volunteers on the impact the programme has on their work via an automated survey link following each volunteer activity. In 2022, we received over 15,000 responses; 90% of respondents said their motivation and pride in the Company had increased as a result of volunteering. 88% said they had experienced a positive change in behaviour or attitude as a result of volunteering.

In 2022, for the third year, we helped the Ban Ki-moon Centre for Global Citizens empower 17 young African leaders through their Global Citizen Scholarship Programme in association with the University of Bordeaux and MCI Innsbruck. The scholars, change-makers in their communities and beyond, developed SDG micro-projects, using the RELX SDG Resource Centre as a source. Projects undertaken by this year's scholars addressed 11 different SDGs and ranged from portable filtration systems in Ethiopia, a climate-smart agricultural waste management system in Ghana, to eco-friendly permeable pavers to mitigate urban heat islands in Kenya.

2022 PERFORMANCE

Establish new strategic global fundraising partnership

The RELX Cares Global Fundraising Partnership allows us to make a significant, long-term positive impact by collectively raising funds across RELX for a charity which significantly benefits disadvantaged young people.

In 2022, we announced a new three-year partnership with Save the Children. We have committed to raising \$150,000 to support their work, which includes improving nutrition and access to school meals; preventing child labour and child marriage; and supporting children's mental health. In 2021, the most recent year for which data is available, their endeavours reached approximately 43m children.

Colleagues will take part in local and global fundraising events to help reach the target.

We will also work with Save the Children on emergency response appeals. Since the partnership began in September 2022, we have made donations to support children affected by floods in Pakistan and Hurricane Ian in the US and contributed to their Children's Emergency Fund which allows them to respond to disasters around the world as they arise.

Save the Children is delighted to be named as RELX's new global fundraising partner. We are looking forward to working together to raise vital funds to support our ambition to help keep children safe, healthy and learning, giving children around the world the chance of the future they deserve.

Caroline Whatley

Director of Partnerships, Save the Children UK

2023 objectives

Employee community engagement – SDG 17 (Partnership for the Goals): Create new opportunities to engage remote workers in RELX Cares

Philanthropic giving – SDG 17 (Partnership for the Goals): Undertake fundraising for Save the Children to help achieve the three-year target of \$150,000

By 2030

Through our unique contributions, significant, measurable advancement of education for disadvantaged young people; investments with partners for maximum impact

Supply chain

Our customers depend on us to provide them with ethically sourced and produced products and services. Therefore, our suppliers need to meet the same high standard we set for our own behaviour.

Managing an ethical supply chain

RELX has a diverse supply chain with suppliers located in over 150 countries across multiple categories, including technology (e.g. software, cloud, hardware and telecom), indirect (e.g. consulting, marketing, contingent labour and travel), and direct (e.g. data/content and production services, print/paper/bind and distribution).

Given the importance of an ethical supply chain, we maintain a Socially Responsible Supplier (SRS) programme encompassing all our business areas, supported by colleagues with expertise in operations and procurement and a dedicated SRS Director from our global procurement function.

Monitoring suppliers

We have a comprehensive Supplier Code of Conduct (Supplier Code), available on www.relx.com in 16 languages, which we ask suppliers to adhere to and display prominently in the workplace. It commits them to following applicable laws and best practice in areas such as human rights, labour and the environment. It also asks our suppliers to require the same standards in their supply chains, including requesting subcontractors to enter into a commitment to uphold the Supplier Code. The Supplier Code states that, where local industry standards are higher than applicable legal requirements, we expect suppliers to meet the higher standards. Our SRS programme is a key aspect of our work to prevent modern slavery and human trafficking in our supply chain as described below.

Through our SRS database, we track suppliers with whom we spend more than \$1m annually, suppliers identified as critical by the business, and those located in medium and high-risk countries (as designated by our third-party developed supplier risk tool) with a spend of more than \$200,000 for the most recent consecutive two-year period. The tool incorporates 11 indicators, including human trafficking information from the US State Department and Environmental Performance Index results produced by Yale University and Columbia University in collaboration with the World Economic Forum. In 2022, 80% of our global spend was risk assessed utilising the supplier risk tool.

Kerri Dwars
VP Direct Procurement
RELX

An ethical supply chain provides products and services utilising socially responsible and sustainable sourcing and operations. Working with suppliers that align with our ethical and environmental standards is critical to RELX and our customers.

► 16

Our Supplier Code of Conduct is available in 16 languages

RELX supplier locations (% of supplier spend)

Based on four quarters ending Q3 2022

The tracking list changes year-on-year based on the suppliers we engage to meet the needs of our business and/or changes in country risk designations within our third-party risk tool. In 2022, there were 724 suppliers on the SRS tracking list, 54 of which were in high-risk countries and 557 in medium-risk countries. This increase in suppliers on our tracking list compared to 2021 (359 suppliers) was due to changes in risk country classifications, which reduced the proportion of suppliers that are signatories to our Supplier Code or have an equivalent code (87% in 2022 compared to 96% in 2021) although the number of tracking list signatories increased significantly. We work with non-signatories to gain agreement to our Code, and/or assess whether they have equivalent standards in place. In 2022, there were 4,467 signatories to our Supplier Code, or have an equivalent code, representing an increase of 22% from the 3,670 signatories in 2021.

We engage a specialist supply chain auditor who undertook 119 external audits on our behalf in 2022: 28 onsite and virtual onsite audits and 91 desktop audits. During a desktop audit, the supplier responds to an online questionnaire and uploads relevant supporting documents followed by a third-party auditor review. For virtual onsite audits, facility representatives wear a video and audio source located in a lightweight harness to allow remote interaction with a qualified auditor. The auditor can then evaluate the facility, conduct interviews, and review the necessary documentation in real time, just as if conducting an in-person audit. During an onsite audit, the auditor will select employees from a full roster to interview (and may select employees on the work floor during the facility walkthrough). Employee interviews are private and confidential and facility management is not allowed to be present. All information gathered from employee interviews is anonymised. When the auditor communicates non-compliance to facility management, they are not allowed to disclose information which could identify the employee or employees to avoid retaliation against them, which is forbidden in the Supplier Code.

Incidents of non-compliance trigger continuous improvement reports summarising audit results and remediation plans. The audit covers critical dimensions of the Supplier Code such as: labour (including child/forced labour, discrimination, discipline, harassment/abuse, freedom of association, labour contracts); wages and hours (including wages and benefits and working hours); health and safety (including general work facility, emergency preparedness, occupational injury, machine safety, safety hazards, chemical and hazardous material, dormitory and canteen); management systems (including documentation and records, worker feedback and participation, audits and corrective action process); environment (including legal compliance, environmental management systems, waste and air emissions); anti-corruption and data security. During 2022 audit locations included Australia, Brazil, Bulgaria, Canada, China, Croatia, Cyprus, France, Hong Kong, India, Ireland, Malaysia, Netherlands, Nicaragua, Pakistan, Philippines, Poland, Romania, Singapore, United Kingdom, United States and Vietnam.

To minimise the risks of deforestation in our production paper supply chain, we utilise the Forest Sourcing module of The Book Chain Project, a shared industry resource for sustainable paper we helped establish, to assess the forest sources of our papers. By year end 2022, 99% of RELX's production paper was graded by The Book Chain Project as known and responsible (sustainable) sources or certified to FSC or PEFC.

In the year we held a RELX Supplier Session, inviting suppliers from across the world to join us in a conversation exploring supplier diversity and business and human rights. The session featured speakers from the UN Global Compact on their Business and Human Rights Accelerator and MSDUK, the UK's leading supplier diversity advocacy network.

Promoting human rights through the Supplier Code

As stated above, the Supplier Code sets out expectations for our suppliers' ethical conduct.

In accordance with the UK's Modern Slavery Act 2015, our Supplier Code specifically prohibits participation in any activity related to human trafficking, based on the American Bar Association's Model Business Conduct Standards to Eradicate Labor Human Rights Impacts in Hiring and Supply Chain Practices.

In 2022, we updated our RELX Modern Slavery Act Statement (MSA), available from  www.relx.com, which states how we are working to avoid human trafficking and modern slavery in our direct operations and in our supply chain.

The Supplier Code stipulates that, where required by law, suppliers will have employment contracts signed with all employees and it requires mechanisms for reporting grievances. It additionally contains a provision on involuntary labour that states unequivocally that suppliers cannot directly or indirectly use, participate in, or benefit from, involuntary workers, including human trafficking-related activities. Suppliers have access to our new Modern Slavery Awareness training, which we make available to suppliers in 16 languages. In addition, we held training for RELX employees with the Slave-Free Alliance on the nature and forms of modern slavery, how to recognise signs and indicators, and steps to take if a victim or incident is identified. We did not receive any reports or audit findings which violated human rights or the Modern Slavery Act in 2022.

The Supplier Code states, "Failure to comply with any RELX term, condition, requirement, policy or procedure...may result in the cancellation of all existing orders and termination of the business relationship between RELX and supplier." It further states that suppliers must not tolerate any retaliation against any employee who makes a good faith report of abuse, intimidation, discrimination, harassment or any violation of law or of the Supplier Code or who assists in the investigation of any such report.

▶ 119

▶ 3.8%

US spend with Veteran, Minority or Woman-owned businesses. In total, including spend with small businesses, 15.4% of US spend was with diverse suppliers

2022 PERFORMANCE

Advance Supplier Diversity and Inclusion Programme

We are committed to proactive engagement with suppliers to ensure that our supply chain reflects the diversity of our communities. In the year, we continued to focus on our US supplier diversity programme while expanding outside of the US. In 2022, 3.8% of our US spend was with Veteran, Minority or Woman-owned businesses. In total, including spend with small businesses, 15.4% of US spend was with diverse suppliers. We use an independent supplier diversity database to classify diverse suppliers.

Diverse-owned businesses interested in working with RELX can register on the RELX Supplier Diversity Registration Portal. While registration does not provide preferred supplier status or guarantee of business, it provides visibility within RELX to potential opportunities. Find out more at www.relx.com/corporate-responsibility/being-a-responsible-business/supply-chain.

Our supplier diversity and inclusion mission is to establish and implement a sustainable Supplier Diversity and Inclusion programme that creates value by:

- promoting the sourcing of goods and services from high-performing, competitive diverse suppliers
- monitoring and measuring the Supplier Diversity and Inclusion Programme effectiveness
- participating in outreach programmes/activities to support diverse suppliers

We received recognition as a WEConnect 2022 Bronze Top Global Supplier Diversity & Inclusion Champion. Bronze level represents a commitment to global supplier diversity and inclusion through inclusive spend, policies and procedures. Supplier diversity and inclusion was also featured during RISE, our 2022 Employee Resource Group conference, to highlight ways to engage diverse suppliers across RELX.

ALIGNING WITH GOOD PARTNERS

KMS Technology

Consistently named in Best Places to Work, KMS Technology and KMS Healthcare, global companies with deep roots in Vietnam, have built a culture of nurturing client success while upholding social responsibility through established standards. As software development and consulting firms, the KMS entities are dedicated to people-centric values in their operations and communities.

KMS Technology has attained ISO 27001, an international standard to manage information security. It also holds a good manufacturing practice certification, which designates that company products are produced in alignment with quality standards.

With its focus on healthcare, KMS Healthcare supported hospitals during the Covid-19 outbreak. Teams in Vietnam donated more than 175 ventilators to patients facing severe medical conditions and 500 necessity packages with protective equipment to medical workers.

The KMS Gives programme annually pledges 1% equity, 1% profits, and 1% time to its communities. KMS regularly engages with non-profit partners such as 48in48, Fulbright University Vietnam, and Per Scholas Atlanta to assist with website development, mentoring and educational initiatives, consistently encouraging individual and team volunteerism.

Despite economic uncertainties, KMS remains determined to provide consistent global support to maximise the success of its customers and partners while pursuing initiatives that can make the world a better place.

When KMS was founded over a decade ago, I wanted to ensure we would foster community well-being. We have built company morale from the top, and I could not be more proud of our teams for enforcing our company values while finding self-fulfilment in their philanthropic efforts across the globe.

Josh Lieberman

President and Co-Founder, KMS Technology

2023 objectives

Responsible Supply Chain – SDG 8 (Decent Work and Economic Growth): Increase number of suppliers as Code signatories; continue using audits to ensure continuous improvement in supplier performance and compliance

Supplier Diversity – SDG 10 (Reduced Inequalities): Advance Supplier Diversity and Inclusion Programme

By 2030

Reduce supply chain risks related to human rights, labour, the environment and anti-bribery by ensuring adherence to our Supplier Code of Conduct through training, auditing and remediation; drive supply chain innovation, quality and efficiencies through a strong, diverse network of suppliers

Environment

We work to increase the positive impact we have on the environment through our products and services which provide essential insight and bring stakeholders together, while also striving to reduce our environmental footprint across our business and value chain.

A positive environmental impact

We make a positive environmental impact through our products and services which inform debate, aid decision makers and encourage research and development.

The CEO is responsible to the Board for environmental performance; the CEOs of our business areas are responsible for complying with environmental policy, legislation and regulations and the CFO is our most senior environmental advocate. Our Global Head of ESG and Corporate Responsibility engages with the Board on environmental issues and our Environmental Champions network, led by the global environment manager, includes employees in key operational areas of the business. We work with Environmental Champions and dedicated engineering, design and real estate specialists to improve efficiency wherever possible in our portfolio.

In 2022, we continued our support of the Climate Pledge, aiming to achieve net zero across all carbon scopes by 2040 at the latest. Part of the UN Race to Zero, we have committed to measure and report greenhouse gas emissions, implement decarbonisation strategies for emissions reductions and address residual emissions with high-quality offsets. We offset the latter in Scope 1, Scope 2 and Scope 3 (work-related flights, hotels, cloud computing, home-based working and commuting), purchasing offsets that met strict criteria and which are subject to certification and reporting requirements. Details of our net zero transition plans are available on pages 67 and 74.

We support progressive environmental legislation and in 2022 continued our membership in the Aldersgate Group, an alliance of leaders from business, politics and civil society, chaired by former UK Prime Minister Theresa May, that drives action for a sustainable economy. In the year, we chaired a panel discussion on engaging SME suppliers on carbon reductions at RX's All Energy event in Glasgow, and became a member of the Net Zero Supply Chains initiative with other companies and NGO partners organised by Pineapple Partnerships.

We are a Taskforce for Climate-related Financial Disclosure (TCFD) supporter and have expanded our TCFD disclosure (see page 73) and remain signatories of We Are Still In, a network of more than 3,900 businesses, universities, cities, states and other organisations, committed to combatting climate change.

David van Rossem
VP, Internal Climate
Programme
Elsevier

Sustainability is important for our business, because a company that ignores environmental issues is simply not future-proof. Having a genuine commitment to climate action is important to our colleagues, investors and customers; it is a golden opportunity to continually operate more efficiently.

► Group certification

to ISO14001 Environmental Management System achieved in 2022

► 74%

reduction in Scope 1 and Scope 2 (location-based) emissions since 2010

Our key environmental impact: environmental knowledge

In creating our products and services we have an impact on the environment in areas such as carbon emissions, energy and water usage. But arguably bigger and more important is our growing portfolio of environmental research, products and services, which spread good practice, encourage debate and aid researchers and decision makers. The most recent results from Scopus show our share of citations in environmental science represented 53% of the total market.

Risk

In 2022, ICIS launched their first hydrogen price assessments. The ICIS European renewable hydrogen assessments are the first structured to be compliant with European Union and UK government standards for producing renewable hydrogen, and provide market participants with confidence to make strategic investment plans.

In the year, Cirium, our aviation analytics business, added new carbon emissions capabilities to its comprehensive aircraft fleet analysis solution, Fleet Analyzer. This expansion allows lessors and other industry participants to consider the carbon emissions of aircraft in their fleet decisions.

Cirium compiles one of the leading datasets on flight emissions. As fuel consumption is considered sensitive information and is not disclosed by airlines, Cirium developed a new methodology based on fuel-burn that factors in an array of variables, including actual flight time (which is more relevant than distance in determining how much fuel was used) aircraft model, aircraft age, engine type, number of seats, passenger load, cargo load, weather, taxi time and runway idling or circling in the air.

Scientific, Technical & Medical

Elsevier organised a free-to-attend webinar series, Becoming Net Zero, which covered topics such as net zero pathways and carbon capture innovation.

The Lancet issued their 2022 Lancet Countdown which tracks the relationship between health and climate change across 43 indicators. The report found that in 2020 extreme heatwaves were associated with 98m more people suffering from food insecurity than the annual average between 1981-2010, and that weather conditions are increasingly leading to the spread of infectious diseases such as Dengue Fever, the likelihood of which increased by 12% over the period.

To mark COP27 in Egypt, Elsevier produced a special issue on climate change which was made freely available on the RELX SDG Resource Centre. The special issue contained over 110 book chapters and journal articles covering a range of key issues and innovations, as well as an episode with Corey Peterson, Chief Sustainability Officer at the University of Tasmania, Australia on the site's World We Want podcast.

Legal

LexisNexis launched a new ESG microsite, based on the LexisNexis Newsdesk platform, with more than 380 topics categorised to collate media reports including on the environment.

In the UK, LexisNexis issued practice notes detailing legal information and briefings on environmental topics such as the 2030 Climate and Energy Framework, planning, greenhouse gas reporting and renewable energy.

Intelligize issued the results of an analysis on SEC comment letters to evaluate the SEC's approach to corporate climate disclosure. It found that before 2021, SEC action focused on information which had not been included in a public disclosure, however from 2021, the focus shifted to accuracy of reported information.

Exhibitions

Held in Glasgow six months after the UN COP26 Summit, Exhibitions' All-Energy 2022 tradeshow showcased solutions for an array of renewable energy challenges. Over 500 speakers took part in the free-to-attend conference, which featured contributions from Scotland's First Minister Nicola Sturgeon and COP26 President Alok Sharma. Alongside All-Energy, Dcarbonise, supported by the Scottish government and Energy Saving Trust, offered end-users advice and technology to help them decarbonise their buildings, businesses and transport systems.

World Future Energy Summit (WFES), held in Abu Dhabi in January 2022, spotlighted five critical industries shaping sustainability and driving investment globally. The Solar & Clean Energy, EcoWASTE, Water, Smart Cities, and Climate & Environment forums featured more than 275 industry leaders, who shared their insights with Middle East investors, policy makers, business leaders, project owners and technology pioneers. Attendees could network, do business and share knowledge about issues critical to sustainable development.

Exhibitions' World Travel Market has the largest responsible tourism programme of its kind in the world – an international forum that aims to engage businesses, government, decision makers and others in spreading sustainable practices and ethical methods across the travel industry. Panel discussions on sustainable and future travel at World Travel Market London in November focused on the business case, and growing customer demand, for responsible tourism; during the programme, the 19th World Travel Market Responsible Tourism Awards recognised 26 businesses and destinations from 21 countries for having a responsible impact on tourism.

Environmental risks and opportunities

The assessment, prioritisation and mitigation of environmental risks are integrated into our overall company-wide risk management process which considers current and emerging risks to achieving RELX's strategic goals. The Board assesses the risk level and mitigation strategies and monitors implementation by senior managers.

Our Environmental Champions network, together with colleagues throughout the business, as well as external stakeholders such as NGOs and investors, help us monitor and rank our environmental risks and opportunities. They are reviewed quarterly by the Environmental Checkpoint Committee, chaired by the CFO, during the year.

Our Global Environmental Policy is available on www.relx.com/cr-downloads and applies to all areas of the business and states that we must consider, among other risks, those that require legislative compliance, have significant cost implications for the business and/or may affect our reputation. The Global Environment Policy is supported by a global Environmental Management System (EMS), certified to the ISO 14001 environmental standard.

We provide our facilities teams an online EMS Implementation Pack containing documentation, training and audit materials to aid the certification process. In 2022, we achieved Group certification to the ISO 14001:2015 standard across the business.

The EMS covers the assessment of existing and emerging regulatory requirements related to climate change, including carbon pricing, taxes and additional reporting requirements.

It includes transition and physical risks and has informed our TCFD report, including transitioning to a lower carbon economy and risks related to physical impacts of climate change. See page 73.

Green Teams, employee-led environmental groups representing 53% of employees in 44 key facilities, help us implement our EMS and achieve environmental improvements at the local level. We are also aided by consistent dialogue with stakeholders including employees, government and NGOs. We participate in sector initiatives, such as the Publishers' Database for Responsible Environmental Paper Sourcing (PREPS), part of the Book Chain Project, and further our understanding through environmental benchmarking activities, such as CDP, where we were scored B in the Climate Change programme and B in the Water Security programme.

Assessing our environmental impact

Although all our environmental impacts are important, we prioritise climate change, minimising the use of natural resources and waste from our own operations. Throughout 2022, we worked to reduce our direct environmental impact by minimising the use of natural resources and efficiently employing sustainable materials and technologies.

We consider upstream and downstream impacts as part of a lifecycle approach to our operations. This includes risks related to the forest sources and production of pulp and paper for our printed products (see further information on page 71), while opportunities include the donation of unsold or returned printed products and IT equipment to development charity partners, decreasing waste and increasing societal benefit, particularly in less-developed nations. See page 70 for further details.

Third-party verification of our environmental data gives us confidence in its reliability and improves our reporting.

Book donations: supporting education

While print is a relatively small portion of our revenue, we must continue to minimise the impact of printed product.

We focus on techniques such as print on demand or print run control to better match production to demand.

We donate excess product to charity partners such as Book Aid International or Books for Africa to avoid waste and benefit communities.

In 2022, RELX donated 146,000 books with a value of over \$10m to our charity partners.

Book Aid International

RELX has been a Book Aid International partner for over 30 years through regular book donations, financial support and staff fundraising and volunteering. RELX donations of medical books are critical to educating the next generation of healthcare providers around the world.

In 2022, we donated 65,945 new higher education and medical books, as well as a grant to help Book Aid International and its partners create a Children's Corner at Mbala Library in Zambia. This will give local children a safe, welcoming space where they can discover the joy of reading and become readers. Librarians are also being trained to support younger children and school students wishing to use the space to study.

At a time when books and access to information are needed more than ever, our partnership with RELX in 2022 enabled us to share the power of books with thousands of the world's most marginalised children and adults. Thanks to RELX, we are inspiring children to discover books through our Children's Corners project in libraries, and ensuring medical professionals have access to the books they need to improve their knowledge and skills.

Alison Tweed, Chief Executive
Book Aid International

Climate change

Our Climate Change Statement supports the scientific community's opinion that human activity is contributing to climate change; we support the Paris Agreement's intention to limit climate change to 1.5°C.

 The RELX Climate Change Statement is available at www.relx.com/cr-downloads.

Changes to working preferences following the Covid-19 pandemic have contributed to decreases in reported carbon emissions since 2020, with many of our people working from home or on a hybrid basis, with more limited business travel. To show trends, we report data over a longer time sequence.

In the year, we added the one events venue managed by RX to our climate reporting. The venue was responsible for approximately 3% of Scope 1 and Scope 2 (location-based) emissions in 2022. We have restated figures since 2015 to include this space. See methodology notes for full details on

 www.relx.com/additional-cr-resources.

We use the Radiative Forcing emissions factors provided by the UK Department for Business, Energy and Industrial Strategy for calculating business travel emissions which take into account the full environmental impact of air travel, such as water vapour, contrails and nitrogen oxide emissions.

Total Scope 1 emissions decreased by 8% in the year due to lower levels of driving in the company car fleet. Car fleet emissions have decreased 78% since 2010 and by 62% in overall Scope 1 emissions.

Scope 2 (location-based) emissions decreased by 15% in the year due to office space consolidations, as well as lower power consumption at our data centres.

Scope 3 business travel data covers all air travel booked and collected through our travel provider, BCD. While resumption of business travel in 2022 led to an increase in emissions over 2021, since 2010, we have reduced travel emissions by 67%.

2022 climate change performance

Absolute Scope 1 and Scope 2 emissions

Intensity Scope 1 and Scope 2 emissions

2022 Environmental Performance

	Absolute performance			Intensity ratio (absolute/£m revenue)		
	2021	variance	2022	2021	variance	2022
Scope 1 (direct emissions) tCO ₂ e	5,644	-8%	5,211	0.78	-22%	0.61
Scope 2 (location-based emissions) tCO ₂ e	44,051	-15%	37,270	6.08	-28%	4.36
Scope 2 (market-based emissions) tCO ₂ e	8,321	8%	8,952	1.15	-9%	1.05
Total energy (MWh)	125,095	-6%	117,997	17.27	-20%	13.80
Water (m ³)	183,575	-15%	156,734	25.34	-28%	18.33
Waste sent to landfill (t)*	150	-51%	73	0.02	-59%	0.01
Sustainable production paper (%)	98	1%pt	99	-	-	-

* From reporting locations only, excluding estimated data

Actual environmental data covers approximately 79% of occupied floor space based on electricity reporting. When we are unable to obtain reliable data, for example from small serviced offices, we estimate energy consumption and water usage on actual data from our portfolio. In this way, our reported data covers all operations, for which we have operational control for a 12-month period, December 2021 to November 2022.

Scope 2 (location-based) emissions are calculated using grid average carbon emissions factors for all electricity sources.

Scope 2 (market-based) emissions are calculated using supplier-specific carbon emissions factors (where available) for renewable energy purchases.

Our Net Zero Commitment

As a signatory to the Climate Pledge, we are committed to becoming net zero by 2040 at the latest. The main tenets of the initiative, a community of more than 370 organisations working to address climate change, is measuring and reporting greenhouse gas emissions and implementing decarbonisation strategies for significant emissions reductions.

Since 2010, we have reduced our Scope 1 and 2 location-based carbon emissions by 74%. In the year, we submitted a carbon target for verification to the Science Based Targets Initiative and are awaiting their review. This aligns with the 1.5°C goal of the Paris Climate Agreement and will require us to continue reducing greenhouse gas emissions, maintain our internal carbon pricing scheme, among other measures.

As stated, we compensated for emissions in Scope 1, Scope 2 and Scope 3 (work-related flights, hotels, cloud computing, home-based working and commuting) by purchasing offsets in 2022 with investments in REDD+ forestry projects in Kenya and Indonesia and a soil sequestration project in the United Kingdom. We do not utilise offsets in our carbon performance reporting.

Road Map

RELX's emissions are aligned with the 1.5°C pathway. We aim to maintain this performance by pursuing further emissions reductions in two primary ways:

1. **Company operations:** By setting and achieving science-based reduction targets that bring us to net zero no later than 2040. Read more about our carbon reduction targets and our carbon performance on pages 66-72.
2. **Value chain:** By engaging with our suppliers on setting and attaining their own science-based carbon reduction targets and addressing emissions from other Scope 3 categories. Read more about how we engage with suppliers on pages 59-62.

RELX will continue to advance wider action on climate change through:

1. The continued development of leading-edge products, services and events on climate change and net zero transition
2. Industry partnerships such as the Responsible Media Forum's Climate Pact and Net Zero Events, an initiative for the global events industry
3. Climate advocacy supporting responsible climate-related initiatives through organisations such as the United Nations Global Compact, The Aldersgate Group, and RE100
4. Sharing climate knowledge with society through offerings such as the free RELXSDG Resource Centre

 www.sdgresources.relx.com

We will continue to advance our net zero efforts through an internal carbon price payable by all business areas for Scope 1, 2 and select Scope 3 emissions. The current price is \$30/tCO₂e and will increase over time.

Climate objectives are monitored by the RELX CR Forum, chaired by the Head of Corporate Affairs, which meets twice per year to agree and assess progress on ESG targets and objectives. Read more about CR governance on pages 40-43.

Executive remuneration is linked to achieving environmental targets including our Scope 1 and 2 carbon reduction target. Read more about executive remuneration on page 126.

Scope 3

In 2022, we continued to advance our understanding of our Scope 3 emissions beyond business flights, identifying key areas, refining our methodology and our direct engagement with suppliers. We used the RELX CO₂ Hub, an internal analytics platform, to help quantify our Scope 3 emissions.

Supply chain (excluding business travel, cloud computing services and events)

We estimated indirect supplier emissions through an improved methodology by collecting data on key suppliers to derive carbon intensity factors. The factors are then extrapolated by spend category to cover our full supply chain. Our supply chain emissions were approximately two times larger than our total Scope 1, Scope 2 (location-based) and Scope 3 (flights) emissions in 2022.

Cloud computing services

While RELX continues to undertake energy efficiency projects at its own data centres, some of the energy and carbon reductions at these facilities have been achieved by moving content to third-party cloud services. With data provided by our primary IaaS cloud providers, we estimated 2022 market-based carbon emissions associated with all cloud computing services provided to RELX to be approximately 160 tCO₂e, a significant reduction on previous years as a primary supplier switched to renewable power.

Home-based employees

Using location-specific emissions factors and office attendance data, we estimated emissions from home working in the year to be approximately 12,000 tCO₂e.

Commuting

Through RELX's Environmental Standards programme, locations are encouraged to develop a local travel plan. Actions from travel plans include publishing information on public transport links, promoting commuter loan schemes and encouraging carpooling. Using daily refreshed office attendance data, we estimated emissions in the year to be approximately 4,000 tCO₂e.

Events

RX has partnered with peers on Net Zero Carbon Events. Launched at COP27 the initiative aims to develop methodologies to quantify and reduce emissions associated with the events industry. Attendance at one of our events can replace the need for multiple business trips. We are looking to better gather emissions data associated with an event's value chain, which we expect to be a sizeable component of our Scope 3 emissions.

Energy

As our business predominantly occupies leased locations with few opportunities for onsite generation, we rely on green tariffs and renewable energy certificates (RECs) to purchase renewables equal to 100% of our global electricity consumption. In 2022, RECs were purchased from sources in Texas, including Peyton Creek Wind Farm (pictured right).

Energy consumption at our offices decreased in 2022 due to ongoing office space consolidation. Data centre energy decreased in line with our long-term trend.

Energy use at our data centres is responsible for 39% of total energy usage (offices account for 50% and warehouses 11%). To advance data centre efficiency, we undertake hardware and other upgrades and have dedicated engineering services.

We expect energy consumption at the event venue managed by RX to increase in 2023, as in-person events continue to return.

2022 energy performance

Energy consumption (Absolute)

Energy leadership

We are a member of RE100, a global initiative bringing together businesses committed to 100% renewable electricity.

► 59%

Reduction in energy and fuels consumption since 2010

RELX Environmental Challenge

2022 marked the twelfth year of the RELX Environmental Challenge, focused on providing improved and sustainable access to water and sanitation where it is presently at risk.

The \$50,000 first prize winner was Caminos de Agua, a Mexican organisation installing groundwater treatment systems to remove harmful contaminants such as arsenic and fluoride from groundwater supplies. The community of Los Ricos (top right) have successfully adopted this low-cost, community-managed system.

The \$25,000 second prize winner was MSABI's True Life Water Points. Based in Tanzania, the organisation has developed a low-cost mobile phone-based insurance model to ensure the maintenance of local water systems (bottom right), particularly in remote regions.

Winning the RELX Environmental Challenge gives us the resources we need to scale our solution for removing arsenic and fluoride from drinking water which will benefit more than 10,000 people in the next five years. It will also allow us to create a model which government and other actors can replicate in communities facing similar water quality challenges around the world.

Dylan Terrell, Founder & Executive Director
Caminos de Agua

Water

The majority of our sites use water from municipal supply and are in developed countries with a high capability for water adaptation and mitigation.

Our water usage decreased 15% between 2021 and 2022 due to ongoing office space consolidation and reduced use of cooling water at data centres.

We engage with internal water experts who produce water-related content for our customers. In 2022, we offered customers 35 peer-reviewed journals in aquatic sciences, including Water Research.

► **68%**

Reduction in water use from 2010 to 2022

2022 water performance

Water usage (Absolute)

Waste

Total waste generated by our locations increased by 8% in 2022, primarily due to the partial return of employees to offices. Of waste generated at all of our locations, 82% was recycled and 93% diverted from landfill through recycling, composting and energy generation from waste. Of the waste produced at our reporting locations, excluding estimated data, 86% was recycled.

Where reliable measurements are not available, we calculate waste based on weight sampling and by counting waste containers leaving our premises. Although local municipalities most often carry out sorting and recycling, we report all waste as going to landfill unless we have robust evidence. For this reason, performance against our recycling target is linked to our reporting locations.

We do not produce any material amounts of hazardous waste.

We also continued to work toward our target to reduce waste sent to landfill from reporting locations. In the period, waste sent to landfill from reporting locations, excluding estimated data, decreased by 51%.

We work to reduce packaging waste from our physical products. In the UK, we provide information on packaging waste in line with the UK government's Producer Responsibility Obligations (Packaging Waste) Regulations 2007. As a member of the Biffpack compliance scheme, we report the amount of obligated packaging we generate through selling, pack and fill and importation of our products.

2022 waste performance

Waste (all locations)

Waste (reporting locations)

Reporting locations are those from which we are able to capture primary data and excludes estimated data. 'All locations' includes non-reporting locations, such as serviced offices, where data is estimated.

A new life for old equipment

We dispose of defunct hardware and other electronic waste according to local regulations and recycle only if equipment cannot be reused.

In the year, we continued our partnership with Camara Education to donate equipment to help disadvantaged students. Camara Education refurbishes our donated equipment which it uses to establish eLearning centres at schools in Ethiopia, Kenya, Tanzania and Zambia. Any equipment that cannot be refurbished is appropriately recycled.

In 2022, Camara Education generated over £53,000 from equipment donated by RELX, enough to fully equip eight new eLearning centres and train teachers to use them effectively. Our 2022 donations saved almost 600 tonnes of CO₂ and kept 2,700kg of waste from going to landfill.

The ongoing support we receive from RELX has helped enormously as schools in Africa recover post Covid-19; it has helped as we develop ambitious plans to increase our impact, providing training and resources to even more young people in need.

Aidan Tallon
CEO, Camara Education

Paper

The quantity of production paper purchased in 2022 decreased by 30% over 2021 and by 57% since 2010 as we deliver more of our products online, reflecting a circular economy approach to conducting our business. Some of this year’s decrease is also attributed to the use of the new reporting tool, see below. 99% of RELX production papers were graded in PREPS as known and responsible sources or certified to FSC or PEFC. We continue to reduce waste and the environmental impact of producing our products through measures such as smaller print runs, litho over digital printing, print on demand and lighter papers where possible.

2022 paper performance

Sustainable production paper

Focus on sustainable paper

We are a founding member of the Bookchain Project’s paper module (PREPS) and helped create the PREPS database which identifies the pulps and forest sources of papers. Each paper is given stars according to sustainability criteria: one (unknown or unwanted material), three (known and responsible), or five (recycled, Forest Stewardship Council or Programme for the Endorsement of Forest Certification certified).

The grading system was initially developed by PREPS member Egmont UK Ltd and sustainability consultants Carnstone, along with input from Greenpeace and WWF.

The RELX Sustainable Production Paper Policy commits us to purchase only sustainable papers - graded three or five by Bookchain, or certified to FSC or PEFC.

In 2022, we used approximately 102 tonnes of office paper. To reduce paper use at sites with higher consumption levels, we have set specific targets.

2022 PERFORMANCE

Launch new online reporting tool for sustainable production paper

Printed products are responsible for 6% of revenues, a share which has been declining as our digital product offerings grow. The potential environmental impacts of paper use in our products such as books or journals remains a focus area for RELX.

In the year, we continued efforts to ensure the paper we use is sourced from sustainably managed forests to eliminate the risk of deforestation from our paper supply chain.

As members of the Bookchain Project we trace the forest sources of the papers we purchase and restrict our supplier to only those papers assessed as grade 3 or 5 (known and responsible sources).

In 2022, we updated our Paper Policy to better support our 100% sustainable paper target. We are committed to purchasing only papers which are graded 3 or 5 in the Bookchain Project, or are certified to FSC or PEFC.

Our historic challenge has been in tracking the papers we use across our supply chain. It resulted in papers that did not meet our evidence criteria to be classed as sustainable. To overcome this, in the year we developed an online paper reporting module using the Ecometrica platform we use to track our environmental data.

This allows suppliers to log in regularly to update details of the paper they use, automatically verifying sustainability credentials against the Book Chain Project ratings and paper certifications. It also enables a more accurate classification of papers to ensure reporting is scoped to papers used in the production of our print products.

The new reporting regime resulted in quarterly performance reporting allowing procurement managers to identify papers which could not be proven sustainable, to liaise with suppliers for more detail.

This new approach means 99% of the papers we purchase are now rated as sustainable, with ongoing efforts to increase this to 100% by 2025 in line with our target.

Targets and standards

Our focus is on delivering continuous improvement in our environmental performance year-on-year. We also set longer term targets to reflect our ambition over time.

We set our carbon reduction target using the Science Based Target Methodology designed by CDP, the UN Global Compact, the World Resources Institute and WWF. It aligns our carbon reductions with those deemed necessary by climate scientists in order to avoid the worst impacts of climate change. Performance against the target is measured in Scope 1 and Scope 2 (location-based) emissions, which means no carbon has been subtracted from our emissions (including for the renewable electricity we purchase).

Our carbon target applies to combined Scope 1 and Scope 2 (location-based) emissions as defined by the Greenhouse Gas (GHG) Protocol. We continue to report on our indirect Scope 3 emissions. See Climate change above for more information.

We set other targets for reducing energy and fuel consumption, increasing the amount of renewable electricity we purchase and decreasing the amount of waste we generate.

In the year, the Risk Solutions Group Green Team held quizzes and competitions focused on saving energy and reducing food waste, single-use plastics and commuting emissions. The Elsevier Amsterdam Green Team planted the first trees for a biodiverse Elsevier forest in Overijssel, Netherlands. Colleagues around the globe made donations: for every tree Elsevier plants in the Netherlands, another is planted in Uganda's Kibale National Park. Elsevier's Climate Action Board advise on key actions and initiatives.

We are a founding signatory to the Responsible Media Forum's Media Climate Pact which requires signatories to set a science-based carbon reduction target and commit to furthering climate awareness and positive action through their content.

As a signatory to the SDG Publishers Compact, we advocate for climate action within our products and the content we publish.

Environmental targets

Focus area	Targets – 2025	2022 performance
Climate change	Reduce Scope 1 and 2 (location-based) carbon emissions by 46% against a 2015 baseline	-60%
Energy	Reduce energy and fuel consumption of our locations by 30% against a 2015 baseline	-46%
Energy	Continue to purchase renewable electricity equivalent to 100% of RELX's global electricity consumption	100%
Waste*	Decrease waste sent to landfill from reporting locations to 35% below 2015 levels	-94%
Production paper	100% of RELX production papers to be graded in PREPS as 'known and responsible sources', or certified to FSC or PEFC by 2025	99%

* From reporting locations, excluding estimated data.

Environmental management system	Achieve Group certification to the ISO14001 standard across the business	Group certification across the business achieved in 2022
	100% of new office fit-outs to achieve RELX Sustainable Fit-Out standard by 2025	RELX Sustainable Fit-Out standard developed
Content	Meet our responsibility under the Media Climate Pact to advance climate knowledge through our content	Content to support climate awareness and positive action (see page 64)

We have reported on all emission sources required under the Companies Act 2006 (Strategic Report and Directors' Report) Regulations 2013. We have included emissions from all RELX operating companies. Environmental data covers 12 months from December 2021 through November 2022.

We have used the GHG Protocol Corporate Accounting and Reporting Standard (revised edition) and the data has been assured by an independent third party, EY.

2023 objectives

Environmental responsibility – SDG 12 (Responsible Consumption and Production): Review global car fleet policies with the aim to move to more fuel-efficient vehicles

Carbon reduction – SDG 13 (Climate Action): Expand climate risk assessment of products by the Climate Product Working Group

By 2030

Further environmental knowledge and positive action through our products and services and, accordingly, conduct our business with the lowest environmental impact possible

CR Disclosure Standards 1

Taskforce on Climate-related Financial Disclosure (TCFD)

RELX makes the following disclosures, consistent with the recommendations of the Taskforce on Climate-related Financial Disclosure (TCFD) All Sector Guidance as required by the Listing Rules (Disclosure of Climate-Related Financial Information) (No 2) Instrument 2021.

I. Governance

a. Board oversight of climate-related risks and opportunities

This statement has been reviewed and approved by the Board.

The RELX Board oversees the internal controls and risk management practices as described on page 88. In addition, climate risk and opportunity is subject to our CR governance processes, see pages 40–43. In the year, the Company's approach to managing its climate change risks and opportunities was covered by the Board at multiple points including in discussions with and papers from the Chief Financial Officer (CFO), responsible to the Board for performance against climate targets; the Head of ESG and Corporate Responsibility; and the Head of Group Insurance and Risk, as part of the RELX Audit Committee review of the Company's risk management process.

The result of these undertakings is that the Board has found climate change has no material impact on RELX's business in the short term and will be unlikely to have a significant impact in the medium and longer term. This is based on the review of RELX's low sector exposure to climate change and consideration of climate change by the business in its strategy, activities, policies, annual budgets, and business plans, setting and monitoring of performance objectives, major capital expenditures, acquisitions and divestitures.

Moreover, this view is predicated on strong climate action by the business in 2022 and over time to mitigate the effect of transition and physical climate change risks as described in this statement and in this report.

b. Management's role in assessing and managing climate-related risks and opportunities

Management in each business area is responsible for identifying customer needs and developing relevant products related to climate change. This ranges from launching and advancing scientific journals with articles on climate change, energy efficiency, and other climate-related topics; providing data and analytics that support customers in reducing their environmental impact; providing information and analytics on laws and regulations related to the environment; and holding exhibitions focused on renewable energy and low carbon solutions.

As RELX's senior environmental champion, the CFO leads the RELX Environmental Checkpoint Committee which sets strategy and targets for measuring and reducing the group's own environmental impact. The group monitors performance throughout the year, tracking emissions across all scopes and performance relative to our target to reduce Scope 1 and 2 (location based) carbon emissions by 46% by 2025 against a 2015 baseline.

Management in each operational area support our environmental goals. They are responsible for ensuring the continuity of the group's operations, including resilience to events caused by extreme weather events. The Business Continuity Forum brings together specialists from across the group to identify risks, assess continuity and incident response plans, learn from incidents and spread best practice.

We recognise climate change intersects with other environmental and sustainability issues. For this reason, climate change is also considered by the RELX Corporate Responsibility (CR) Forum, with oversight by the Head of Corporate Affairs, a member of the executive committee, and led by the Head of ESG and Corporate Responsibility. The CR Forum meets twice per year and comprises more than 100 participants including function heads and business area leads from across the Company.

Management is informed about climate-issues through quarterly business climate reporting, the certified ISO14001 Environmental Management System and by engagement with internal and external networks.

II. Strategy

a. Climate-related risks and opportunities in the short, medium, and long term

While we are in a low carbon intensive sector, the Board and the Environmental Checkpoint Committee continued to consider our climate-related risks and opportunities based on the scenarios in section c below. Examples of our findings for various timeframes are outlined below. The long term time horizon aligns with the timeframe of the Paris Climate Agreement and the medium term with our ambition to achieve net zero by 2040.

Short (<10 years) – Transition risks: Policy and legal requirements relative to climate change will continue to increase as they have over the last six years requiring us to ensure adequate disclosure; there will be increasing stakeholder pressure requiring us to ensure our products and services help accelerate the green transition for our customers in carbon intensive and other industries. **Physical risks:** Variability in weather patterns and more frequent extreme weather events mean we must advance both mitigation and adaptation strategies, including through our business continuity planning. See page 77 for further information on TCFD risks.

Medium (10 to 20 years) – Transition risks: There will likely be increased pricing of GHG emissions and enhanced reporting obligations, particularly in areas like supply chain emissions; reputational damage could result if we do not show medium-term results for meeting our obligations as a signatory of The Climate Pledge and similar initiatives. **Physical risks:** Gradual increase of average temperatures will affect businesses we operate in some locations more than others, so we are developing country and local response plans; mean temperature rise will likely affect our suppliers as well and we will continue our due diligence related to exposure in our supply chain.

Long term (20 years +) – Transition risks: Stigmatisation could result if our products and services are not seen as part of the solution to climate change; this creates an opportunity for us to increase offerings that support a lower carbon future. Physical risks: Sea level rise will be varying but worse under the business as usual scenario which will increase risk of business interruption and damage to property; we recognise that this must be part of our planning for the places where we will operate.

Risks and opportunities have been identified through the risk assessment process, as described in Governance above and detailed on pages 88–95, and through working groups such as the Climate Product Group, CR Forum and other networks.

Our carbon action hierarchy is to first, reduce our carbon emissions; second, to purchase increasing amounts of green tariff energy as availability improves in global markets where we operate; and third, to purchase certified renewable energy certificates where necessary. Our performance reporting is based on our gross emissions, and we also purchase high-quality, verified offsets for residual emissions. We offset residual emissions in Scope 1, Scope 2 and Scope 3 (work-related flights, hotels, cloud computing, home-based working and commuting) purchasing offsets that met strict criteria, and which are subject to certification and reporting requirements. RELX is committed to achieving net zero emissions following our carbon action hierarchy across all scopes by 2040 at the latest, including through our participation in The Climate Pledge, part of the UN Race to Zero campaign.

b. Impact of climate-related risks and opportunities on our business, strategy, and financial planning

In 2022, energy represented less than 1% of the RELX cost base. Although energy costs, and associated carbon costs, may increase substantially, the impact on RELX's financial results is likely to remain limited.

While we do not believe climate risk will have a material impact on our revenue, there is careful review within the relevant businesses to assess impacts of providing products and services that help customers with their energy transition as traditional sector activities may not be viable in the longer term.

While we will continue to advance our efforts to achieve net zero, we do not believe they will have a material impact on RELX financial planning as described in Governance above.

We are using the climate scenarios we outline below to inform strategy and financial planning at both the Board and business area level. One example is our work with finance and other teams across the business to price carbon, which we raised to \$30 tCO₂e in the year (which will increase over time). Proceeds will be used for, among other measures, internal climate action projects where possible. In the year, we began a cross-business review of climate-related product risks. Printed and face to face products, responsible for 17% of total revenue, face more exposure to risks such as weather-related logistics disruption than do our digital offerings; see Principal Risks on page 88.

We are factoring climate change into strategy planning for our portfolio as our scientific research information, analysis of environmental law, tracking of carbon and recycling markets, among other products and services, becomes increasingly important for our customers, investors and other stakeholders in their own responses to climate change. A small proportion of customers operate in carbon intensive industries, including agriculture and aviation, and we are committed to supporting them, and those in other industries, with their energy transition. There are no technology-related dependencies in realising opportunities to help customers reduce their carbon impact, though new opportunities may arise as technology advances.

In Risk, products such as Cirium, which serves the aviation sector, is deploying an improved methodology for calculating flight emissions; helping airlines better plan and conduct maintenance of their fleet to ensure efficient operation; and identifying flight routes for maximum occupancy so emissions per passenger are lower.

Elsevier is working to support clean energy. In 2022, Elsevier launched a free report titled Pathways to Net Zero: global south research in the transition to clean energy. The books team further implemented its Energy with Purpose mission statement to only commission new content that advances the energy transition and reduction of CO₂ emissions. Leadership made the decision to close one hydrocarbon journal and transition remaining titles with updated aims and scope, explicitly calling for research related to UN Sustainable Development Goal (SDG) 7, Affordable and Clean Energy. Colleagues are recruiting editorial board members who specialise in specific renewable technology areas and working to increase global south representation. Elsevier's Geofacets, which provides geological and geophysical data to academic and corporate customers, only added new content, features and functionality that support the energy transition and other related SDGs, including sustainable mineral mining projects essential for renewable technologies such as battery and solar cells. The remaining use cases focused on discovering efficiencies in established energy projects rather than new fossil fuel exploration.

LexisNexis Legal & Professional provides LexisPSL Environment to help clients identify environmental liabilities, understand the commercial implications of environmental law and keep track of current developments with daily news feeds on new cases, legislation, and consultations as well as practice notes, Q&As, and legal precedents.

RX holds World Future Energy Summit, a portfolio of events specifically designed to combat climate change, in line with the United Nations Sustainable Development Goals (SDGs) and the Paris Agreement. Ahead of Batimat, the world's largest event dedicated to building and construction, RX embarked on a Low Carbon Construction Tour of 12 European and African cities to raise awareness of low-carbon solutions for the construction industry. Of the approximately 400 shows we organise, less than 5% are in carbon-intensive industries.

All RELX business areas are contributing content to the RELX SDG Resource Centre which provides free access to news, research, tools and events on the SDGs, including SDG 7 Clean and Affordable Energy and SDG 13 Climate Action. The site also incorporates relevant content from key partners, including the UN Global Compact (UNGC). In support of COP27, we released a climate change special issue on the free RELX SDG Resource Centre, a curated list of 110 journal articles and book chapters to inspire positive environmental action and further climate research.

c. Resilience of the organisation's strategy, taking into consideration different climate-related scenarios, including a 2°C or lower scenario

We have a threefold strategy to address climate-related risks:

1. Minimising our environmental impact through measures such as energy efficiency, renewable energy, reducing waste and other measures. This reduces our exposure to future legislation and the rising price of carbon
2. Providing products and services which support customers through their transition to a low-carbon economy. We anticipate demand for these offerings to continue to increase over time
3. Supporting wider action on climate change through collaboration, partnerships and initiatives such as the Digital Impact of Media Project in conjunction with the Responsible Media Forum, comprised of industry peers, and Bristol University

The Board and the Audit Committee as part of robust risk control measures covering our products and operations (including our property portfolio and supply chain) ensures management of both the transition and physical risks of climate change. The Environmental Checkpoint Committee provides data on climate change metrics and advice to the Board and also engages people throughout the business. We gain and share best practice through engagement with the UNGC, Race to Zero, Media Climate Pact, Net Zero Carbon Events, and the Science-based Targets initiative, among others.

We have considered three possible future scenarios and estimated possible timeframes. They are not exact descriptions of an expected future, but provide an outline description of each based on certain assumptions. In scenarios where extreme weather events occur more frequently, we may see increased incidents that disrupt our operations, necessitating additional measures, with some potential cost, to ensure our operational resilience. However, in the context of RELX's overall cost base, we would not expect any such incremental cost to be significant. We believe our strategy will be resilient even in the most challenging future scenario.

Scenario 1: Business as usual (RCP 8.5). In this scenario, carbon emissions continue to increase at current rates and temperature increases exceed 4°C by the year 2100.

Short term: While some policies could be introduced to reduce carbon emissions, action is limited. Some countries may price carbon emissions and set standards for building and vehicle energy efficiency.

Medium term: The availability of renewable energy may grow, but the share of energy from fossil fuels will remain sizeable. With this level of warming, extreme and severe weather events will likely increase. Drought and increased precipitation will impact agriculture. Severe storms will interfere with our supply chains and logistics. The heightened need for innovation in climate adaptation infrastructure may increase demand for our environmental products and services for the scientific, technical and other communities.

Long term: Rising sea levels will affect land use of coastal and low-lying regions where we may have operations, requiring investment to protect or relocate key Company facilities to ensure business continuity. Significant government investment will be required to mitigate the impacts, for example in strengthening flood and coastal defences or securing reliable water supplies, with follow-on effects for places where we and future customers operate.

Political instability in some regions may increase as populations compete for resources such as fresh water supplies and as large numbers of people move from regions most heavily impacted by climate change. Global economic uncertainty will likely become the norm, with limited growth at best and decline at worst. There will likely be significant health impacts as well. As impacts become more apparent, public sentiment may favour organisations such as RELX that have taken action to limit the impact of climate change.

We would continue to pursue measures such as science-based carbon reductions, implementation of innovative technological solutions, carbon sequestration and (re)forestation, but without the catalyst of global government investment in these areas.

Scenario 2: 2°C climate change (RCP 2.6). In this scenario, carbon emissions are halved by 2050 and climate change does not exceed 2°C by the year 2100.

Short term: Countries would introduce more challenging carbon targets as they update their Nationally Determined Contributions under the 2015 Paris Climate Agreement. A range of new policies would most likely be introduced across many countries to control carbon emissions including carbon pricing, higher standards on building and vehicle energy efficiency, with increased renewable energy generation in global power grids. Such developments will be reflected in our policies and procedures, and could increase the demand for our climate-related products and services.

Medium term: There would likely be public and private investment in greater carbon sequestration, capture and storage, (re)forestation, and other measures – all of which would aid action in these areas within our business.

Long term: The frequency of extreme weather events will increase but not as much as under Scenario 1. There will still be disruption to transport and logistics through storms, but sea level rise will be more limited, as will costs we may face associated with adaptation and mitigation projects. With reduced climate impacts, political and economic instability will be lessened. Climate-related migration will still be a factor but to a smaller degree than anticipated under Scenario 1.

Scenario 3: 1.5°C climate change (RCP1.9). In this scenario, to achieve a 66% chance of avoiding more than 1.5°C warming by 2100, inclusive and sustainable development will be a key consideration for policy makers with high levels of international cooperation.

Short term: Emissions must peak in the early 2020s to achieve net zero emissions by 2050. These ambitious carbon reductions would be supported by new policies (with carbon prices reaching as much or more than four times the price under the 2°C scenario) and strong regulation.

Medium term: Buildings will be subject to tougher standards to achieve carbon reductions of nearly three times those under the 2°C degree scenario. Energy costs and associated carbon costs could be higher than in Scenario 1 or 2, but this is unlikely to have a major impact for RELX as energy is not a significant part of our cost base as indicated above.

The transport sector will see significant change, with the majority of vehicles powered by alternative sources. Nature-based solutions to climate change, such as forestation, are also likely to play an important role. In this scenario, RELX efforts to reduce emissions, seek technology-driven carbon solutions and the pursuit of nature-based decarbonisation will be magnified.

Long term: By 2050, approximately 80% of global energy should be from renewable sources. Use of coal will decrease significantly and oil will drop to very low levels by 2060, which may impact the energy costs paid by RELX. After 2050, technologies such as bioenergy and carbon capture and storage will need to be widespread to remove excess carbon from the atmosphere to ensure emissions are net negative.

III. Risk management

a. Our processes for identifying and assessing climate-related risks

The principal and emerging risks facing the business, which have been assessed by the Audit Committee and Board, are described on pages 88-95. The directors have considered the risk of climate change to the business, including the positive contribution that RELX makes through activities such as supporting academic research, pricing recyclable materials, and enabling customers to access our products electronically.

Climate-related risks are assessed as part of the RELX risk management process. Risks are formally reviewed every six months. Each risk is assigned a significance based on the potential impact to revenue and the likelihood of that risk being realised. As part of our Environmental Management System, climate risk assessment covers transition and physical risks as described above and below, and also includes the assessment of existing and emerging regulatory requirements related to climate change. These include carbon pricing schemes, taxes and additional reporting requirements.

b. Our processes for managing climate-related risks

Climate change responsibilities are assigned to key roles, including the CFO at the executive level. Performance is monitored and evaluated throughout the year by the environmental checkpoint group, chaired by the CFO, and new programmes are introduced as required to control climate-related transition and physical risks.

On legislative and product trends, we gain insights through our Government Affairs teams, external fora such as the Aldersgate Group, and ISO 14001 environmental certification of our EMS. We speak with experts in the business, our climate-related employee resource groups including Green Teams and Elsevier's Climate Board, and learn through industry specific networks such as the Responsible Media Forum's Climate Pact and cross-sector networks like the CR and Sustainability Council of the Conference Board, chaired by our Head of ESG and Corporate Responsibility.

The business continuity programme, under the direction of the RELX Business Continuity Forum, oversees mitigations of climate change physical risks on our operations through business continuity plans which include remote working and detailed employee information.

We mitigate potential climate-related risks on our supply chain through supplier management practices in the Global Procurement team, the Supplier Resiliency Working Group, the Business Continuity Forum and the Socially Responsible Supplier programme, which includes supplier engagement on their activities and policies, and a risk-based programme of supplier audits and remediation.

High-level net zero roadmap

RELX carbon emissions are in line with the reductions required to ensure climate change of no more than 1.5°C.

To achieve net zero across all Scopes by 2040 at the latest, we are following a broad programme of action to achieve further reductions. This will include developing products and services that support the transition to a net zero economy, alongside actions to reduce our emissions.

Short term

- Continue office space consolidation in line with the working preferences of colleagues
- Migration from owned data centres to more energy efficient third party cloud providers
- Purchase of renewable energy equal to RELX's global electricity consumption
- Continue to quantify and report on Scope 3 emissions from our supply chain and value chain
- Engage suppliers to adopt 1.5°C aligned carbon reduction targets
- Purchase of high quality carbon offsets to equal our residual emissions

Medium term

- Transition company car fleet to zero emission (e.g. electric) vehicles
- RELX renewable energy purchases in more markets
- Encourage purchase of renewable energy by suppliers

Longer term

- Purchase of carbon neutralisation offsets for residual emissions

IV. Metrics and targets

We aim to provide additional insight into revenue from products and services designed for a low carbon economy in subsequent disclosures. Scope 1 + 2 (location-based) emissions reduction targets and energy reduction targets are set out on page 72 of this report. The remuneration of the CEO and the CFO is linked to the achievement of environment targets. These included in 2022, a key performance objective to reduce Scope 1 and Scope 2 (location-based) carbon emissions by 36% against a 2015 baseline, with 60% achievement; to reduce energy and fuel consumption by 25% against a 2015 baseline, with 47% achievement; and to purchase renewable energy equivalent to 100% of RELX's global electricity consumption. See page 126 for further details.

In the year, we entered into a new \$3bn committed bank facility which has pricing linked to three ESG performance targets. The cost of the facility is reduced if two or more ESG targets are achieved in each year and increased if two or more ESG targets are missed in each year. The targets relate to carbon emissions reduction, as well as increasing the unique users of the RELX SDG Resource Centre and increasing the content available on the RELX SDG Resource Centre. See page 39.

TCFD Risks

We have considered climate-related risk areas detailed in the TCFD guidance as detailed below. While we do not believe climate-related risks will have a material impact on our business, we have highlighted risks areas which present the most opportunity for us to support the net zero transition.

Risk group	Type	Climate-related risk	Implication	Opportunity
Transition risks	Policy and legal	Increased pricing of GHG emissions: The rapid transition to a low carbon energy system could require higher energy prices and a higher carbon price to disincentivise the use of fossil fuels	RELX has low exposure to energy and carbon pricing (less than 1% of total spend) and has achieved significant reductions in energy consumption since 2010. For this reason, moderate to significant increases in energy costs will have a limited impact on RELX.	There will be an increased need for information on energy and carbon pricing; research on energy transition and zero carbon; and events which bring stakeholders together to showcase related technological innovation are likely to increase the demand for RELX products and services.
		Enhanced emissions-reporting obligations: An increasing number of governments are likely to impose requirements on business to achieve the low carbon transition. New requirements are likely to include additional reporting and transparency requirements for GHG emissions	RELX has processes in place for carbon reporting and disclosure aligned with various best practice frameworks. Additional reporting requirements are expected to have insignificant financial implications. Widespread introduction of different reporting regimes in the countries where we operate could increase the risk of non-compliance (and therefore the risk of fines). However, RELX operates an environmental management system certified to ISO14001 which requires a compliance assessment with environmental legislation. This reduces the risk of non-compliance with future reporting regulations.	As new regulations are introduced, there will be a greater need for guidance; this could result in an increased demand for our risk, science, legal and other products and services.
		Mandates and regulation affecting existing products and services: New regulations may be introduced for products to support the transition to a low-carbon economy	RELX delivers products and service primarily in three ways: i) online/digital; ii) printed products; iii) in-person events. Increasing regulation on products in these areas could result in a increased cost for providing those products and services. Online/digital: Products served by RELX-owned data centres are covered by the purchase of renewable electricity and RELX's net zero commitment. RELX is engaging with Scope 3 suppliers for greater transparency on our share of their carbon emissions and renewable energy. Printed products: Revenue from printed products has decreased significantly since 2010 as more product offerings are made online. Paper used in RELX's printed products complies with the RELX Sustainable Paper Policy which requires all papers are from known and sustainable sources and/or certified to a recognised standard. In person: Exhibitions is part of an events industry initiative, Net Zero Carbon Events, working to achieve net zero by 2040. This commitment requires significant reductions in carbon emissions and partnerships with other industries to minimise events-related emissions. A small proportion of our customers operate in carbon-intensive industries, and less than 1% of the journals we produce specifically cover content related to hydrocarbon; we continue to ensure they focus on supporting relevant customers in their energy transition.	New regulations on products will, in many cases, be best addressed through industry collaboration. Our convening power in the markets we serve can support such industry collaboration.
	Technology	Substitution of existing products and services with lower emissions options	RELX has largely transitioned from printed physical products to online/digital products and services. This avoids the emissions associated with the manufacture and distribution of printed products but introduces emissions associated with the use of data centres for the digital offerings. RELX-owned data centres are covered by renewable electricity and RELX's net zero commitment. As described, we are engaging with our cloud providers for greater transparency on carbon emissions and renewable energy.	Our products, services and events aid the low-carbon transition benefiting our customers and society.
		Costs to transition to lower emissions technology	The cost implications for transitioning to new technology are primarily in our supply chain. Printed products are manufactured and distributed by suppliers on behalf of RELX. RELX engages its suppliers through the Socially Responsible Suppliers programme and has processes in place for reporting on its supply chain-related emissions.	Detailed energy and carbon market insights we can provide through our products, services and events will allow companies to better assess the risks and costs of transitioning to lower emissions technologies.
	Market	Changing customer behaviour	Significant increases to the cost of air travel due to the factoring in of carbon charges may discourage business travel in favour of virtual meetings. This could lead to a reduction in the number of attendees at in-person events affecting our events business. We offer virtual attendance options and in-person participation allows exhibitors and attendees to hold numerous meetings during one event.	The ability for an exhibitor or event attendee to maximise engagement by attending one event, for example, with customers, prospects, and suppliers, can become more valuable as the cost of travel increases.
		Uncertainty in market signals	As businesses take action to combat climate change, they might need to change business models or practices to ensure their success in a low-carbon economy. Some of these changes may raise questions for investors or other stakeholders and reduce visibility of the business's strategy. RELX provides detailed and transparent disclosure on climate change to provide clarity to investors and other stakeholders.	Businesses can develop new disclosures to effectively communicate plans with stakeholders. The demand for our products which provide company and market insights could grow as investors' requirements for reliable information and data increases.
		Increased cost of raw materials: Low-carbon requirements on the use, and distribution, of raw materials could lead to an increase in their cost	RELX does not manufacture products from raw materials. An increase in the cost of raw materials would primarily impact RELX via higher prices in our supply chain.	Pricing insights in key supply chains such as chemicals and plastics are provided within our Risk business. If cost and price volatility increases, there could be a greater demand for such products and services.
Reputation	Shifts in consumer preferences	Business customers may become more aware of environmental concerns and expect a high standard of performance from companies. Over time, this may lead to a decrease in demand for carbon intensive products as consumers move to low emission alternatives.	While we do not produce consumer products, we do serve a variety of industries and can support their efforts to decarbonise through our products, services and events.	

Risk group	Type	Climate-related risk	Implication	Opportunity
		Stigmatisation of sector: Products and services offered to carbon-intensive industries could result in negative public reaction	We offer products and services across a wide range of industries, some of which are carbon-intensive industries. We are working to support these industries in their transition to a low-carbon economy.	Industries which face the greatest challenges in decarbonisation will need support, information and tools. We will continue developing new products and services to assist these industries in their decarbonisation efforts.
		Increased stakeholder concern or negative stakeholder feedback: Poor performance could result in negative feedback from stakeholders such as investors or colleagues	RELX sets environmental targets on a five-year cycle and has a science-based carbon reduction target which aligns its emissions reductions with those required to meet the 1.5°C ambition of the Paris Agreement.	Maintaining good environmental performance provides a reputational benefit with our stakeholders, including investors. Strong environmental performance and commitments may be reflected in improved or lower cost financing.
Physical risks	Acute	Increased severity of extreme weather events such as cyclones and floods: severe weather could interrupt normal business operations	RELX operates a comprehensive business continuity programme to ensure colleagues can work remotely and be informed should a location be impacted by severe weather conditions. This allows the business to function despite the impact of the severe weather. As risks associated with weather events increases, insurance premiums paid by RELX could increase.	We provide products that help to assess and quantify insurance perils. As insurance premiums increase, demand for these products will likely grow as insurance providers seek more accurate weather-related risk assessments.
	Chronic	Changes in precipitation patterns and extreme variability in weather patterns: Such changes could affect agricultural processes	Printed products require supply of wood from sustainable forest sources. Changes in precipitation and weather patterns could disrupt the growth in forest sources known to be sustainably managed which could increase the price of sustainable paper. RELX has flexibility in the types of paper used and the forest sources of these papers which allows purchases to be made elsewhere should the need arise. As a member of the Book Chain Project, we assess the sustainability of a large number of papers, allowing us to consider alternatives.	We offer products that use data analytics to help increase the efficiency of land use in areas such as water consumption and fertiliser use. Demand for such products could grow as a response to decreasing yields due to weather.
		Rising mean temperatures: The gradual increase of average temperatures is a factor of climate change	Climate change will affect temperatures differently in different locations. This means that, over time, the operation of some offices will become less efficient as they may need to maintain physical working conditions close to or outside the range for which they were designed. This could lead to an increase in operational costs as more energy will be required for cooling.	Rising mean temperatures will require government to review, and businesses to implement, new building standards and guidelines. Our business areas would produce guidance to assist customers to interpret associated new standards and planning regimes.
		Rising sea levels	If sea levels rise significantly there is increased risk of property damage to any RELX locations in low-lying coastal regions. This could increase insurance premiums or disrupt the working arrangements of colleagues in those locations. We have a comprehensive business continuity programme in place to mitigate such impacts and consider climate risk in the siting of our offices.	We offer products that help to assess and quantify insurance perils risk. As insurance premiums increase, demand for these products could grow.

CR Disclosure Standards 2

Sustainability Accounting Standards Board (SASB) disclosure

SASB Standards enable businesses around the world to identify, manage and communicate financially material sustainability information to their investors. The SASB standards are industry specific and identify the minimal set of financially material sustainability topics and their associated metrics for the typical company in an industry

SASB assigns RELX to the Professional and Commercial Services sector. The following disclosure is made according to the SASB standard for that sector.

Topic	Accounting metric	Code	Disclosure location
Data security	Description of approach to identifying and addressing data security risks	SV-PS-230a.1	See page 42
	Description of policies and practices relating to collection, usage and retention of customer information	SV-PS-230a.2	See page 42
	(1) Number of data breaches, (2) percentage involving customers' confidential business information (CBI) or personally identifiable information (PII), (3) number of customers affected	SV-PS-230a.3	Except as a matter of public record, RELX does not disclose this information for reasons of commercial confidentiality
Workforce diversity and engagement	Percentage of gender and racial/ethnic group representation for (1) executive management and (2) all other employees	SV-PS-330a.1	See pages 46-47
	(1) Voluntary and (2) involuntary turnover rate for employees	SV-PS-330a.2	See page 44
	Employee engagement as a percentage	SV-PS-330a.3	See page 44
Professional integrity	Description of approach to ensuring professional integrity	SV-PS-510a.1	See pages 40 and 43
	Total amount of monetary losses as a result of legal proceedings associated with professional integrity	SV-PS-510a.2	Except as a matter of public record, RELX does not disclose this information for reasons of commercial confidentiality
Activity metrics	Number of employees by (1) full-time and part-time, (2) temporary, and (3) contract	SV-PS-000.A	See page 44
	Employee hours worked, percentage billable	SV-PS-000.B	See page 44

CR Disclosure Standards 3

Global Reporting Initiative (GRI) Content Index

This report has been prepared in accordance with the GRI Standards: Core option

GRI Standard Number	GRI Standard Title	Disclosure Title	Page number
GRI 102	General Disclosures	Name of the organization	Title page
GRI 102	General Disclosures	Activities, brands, products, and services	5-7
GRI 102	General Disclosures	Location of headquarters	28
GRI 102	General Disclosures	Location of operations	7
GRI 102	General Disclosures	Ownership and legal form	147
GRI 102	General Disclosures	Markets served	7
GRI 102	General Disclosures	Scale of the organization	7
GRI 102	General Disclosures	Information on employees and other workers	44-49
GRI 102	General Disclosures	Supply chain	59-62
GRI 102	General Disclosures	Significant changes to the organization and its supply chain	59-60
GRI 102	General Disclosures	Precautionary Principle or approach	63-77
GRI 102	General Disclosures	External initiatives	33
GRI 102	General Disclosures	Membership of associations	33
GRI 102	General Disclosures	Statement from senior decision-maker	4
GRI 102	General Disclosures	Values, principles, standards, and norms of behaviour	29, 40-41, 44-49
GRI 102	General Disclosures	Governance structure	31, 40, 102-106
GRI 102	General Disclosures	List of stakeholder groups	32-33, 109-112
GRI 102	General Disclosures	Collective bargaining agreements	44-48
GRI 102	General Disclosures	Identifying and selecting stakeholders	32-33, 109
GRI 102	General Disclosures	Approach to stakeholder engagement	32-33, 109
GRI 102	General Disclosures	Key topics and concerns raised	32
GRI 102	General Disclosures	Entities included in the consolidated financial statements	162-165
GRI 102	General Disclosures	Defining report content and topic Boundaries	28, 32
GRI 102	General Disclosures	List of material topics	32
GRI 102	General Disclosures	Restatements of information	31
GRI 102	General Disclosures	Changes in reporting	31
GRI 102	General Disclosures	Reporting period	31
GRI 102	General Disclosures	Date of most recent report	23/2/23
GRI 102	General Disclosures	Reporting cycle	Annual
GRI 102	General Disclosures	Contact point for questions regarding the report	28
GRI 102	General Disclosures	Claims of reporting in accordance with the GRI Standards	29
GRI 102	General Disclosures	External assurance	56
GRI 103	Management Approach	Explanation of the material topic and its Boundary	32, 72
GRI 103	Management Approach	The management approach and its components	29-33
GRI 103	Management Approach	Evaluation of the management approach	29-33, External assurance 56 and 80

Independent Assurance Statement to RELX PLC Management

Scope

We have been engaged by RELX Group plc ("RELX") to perform a 'limited assurance engagement,' as defined by the International Standards on Assurance Engagements, here after referred to as the engagement, to report on RELX's corporate responsibility data indicated with a '^' symbol contained in page 31 of RELX's Annual Report (the "Subject Matter") for the year ended 31st December 2022 (referred to as the "Report").

This data is reported under the following headings in the Report:

- People
- Health and safety
- Socially Responsible Suppliers
- Environment
- Climate change
- Paper
- Our unique contributions (SDGs)

Other than as described in the preceding paragraph, which sets out the scope of our engagement, we did not perform assurance procedures on the remaining information included in the Report, and accordingly, we do not express a conclusion on this information.

Criteria applied by RELX

In preparing the Subject Matter, RELX applied their corporate responsibility reporting guidelines, comprising the 'RELX Reporting Guidelines and Methodology 2022' (Criteria).

RELX's responsibilities

RELX's management is responsible for selecting the Criteria, and for presenting the Subject Matter in accordance with that Criteria, in all material respects. This responsibility includes establishing and maintaining internal controls, maintaining adequate records and making estimates that are relevant to the preparation of the Subject Matter, such that it is free from material misstatement, whether due to fraud or error.

EY's responsibilities

Our responsibility is to express a conclusion on the presentation of the Subject Matter based on the evidence we have obtained.

We conducted our engagement in accordance with the International Standard for Assurance Engagements Other Than Audits or Reviews of Historical Financial Information ('ISAE 3000'), and the terms of reference for this engagement as agreed with RELX on 16th January 2023. Those standards require that we plan and perform our engagement to express a conclusion on whether we are aware of any material modifications that need to be made to the Subject Matter in order for it to be in accordance with the Criteria, and to issue a report. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material misstatement, whether due to fraud or error.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our limited assurance conclusion.

Our Independence and Quality Control

We have maintained our independence and confirm that we have met the requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, and have the required competencies and experience to conduct this assurance engagement.

EY also applies International Standard on Quality Control 1, Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Description of procedures performed

Procedures performed in a limited assurance engagement vary in nature and timing from and are less in extent than for a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. Our procedures were designed to obtain a limited level of assurance on which to base our conclusion and do not provide all the evidence that would be required to provide a reasonable level of assurance.

Although we considered the effectiveness of management's internal controls when determining the nature and extent of our procedures, our assurance engagement was not designed to provide assurance on internal controls. Our procedures did not include testing controls or performing procedures relating to checking aggregation or calculation of data within IT systems.

A limited assurance engagement consists of making enquiries, primarily of persons responsible for preparing the Subject Matter and related information and applying analytical and other appropriate procedures.

Our procedures included:

1. Performed detailed testing on the ESG Data Sets and carried out the following activities to assess the Subject Matter:
 - a. Conducted interviews with key personnel to understand the process for collecting, collating and reporting the Subject Matter during the reporting period
 - b. Reviewed certain documentation related to guidance and training for the Subject Matter, and minutes outlining relevant initiatives
 - c. Undertook analytical review procedures to understand the appropriateness of the data
 - d. Performed testing, on a sample basis, against underlying source information to check the accuracy and completeness of the data and the appropriate application of the Criteria
 - e. Understood global estimation methodology to determine how it should be applied correctly and consistently
 - f. Assessed the Report for the appropriate presentation of the data, including limitations and assumptions

We also performed such other procedures as we considered necessary in the circumstances.

Emphasis of matter

RELX reported 100% of its electricity purchased from renewable sources for 2022, relying on green tariffs and renewable energy certificates (RECs). However, it should be noted that, for 2022, 23% of this percentage reported related to US RECs that have been applied to countries outside the United States. This means that the location of the purchased RECs differs from the location where they have been applied. This does not affect our conclusion on the Report as set out below.

Conclusion

Based on our procedures and the evidence obtained, we are not aware of any material modifications that need to be made to the Subject Matter as of 31st December 2022 in order for it to be in accordance with the Criteria.

Use of Our Assurance Statement

We disclaim any assumption of responsibility for any reliance on this assurance report or its conclusions to any persons other than RELX, or for any purpose other than that for which it was prepared. Accordingly, we accept no liability whatsoever, whether in contract, tort or otherwise, to any third party for any consequences of the use or misuse of this assurance report or its conclusions.
